Teaching Learners with Visual Impairment Maximus M. Sefotho, Ronél Ferreira, 2020-12-31 This book *Teaching Learners with Visual Impairment* focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.

An Evaluation of the Capacity of South African Schools to offer Multi-grade Teaching Dr Segwadi Joseph Kokela, Dr KS Malatji, 2023-08-24 Small schools due to a variety of reasons are compelled to opt for multi grade teaching in which learners of more than one grade are taught in one class. Resultantly, the purpose of this study was to evaluate the capacity of South African schools in the implementation of multi grade teaching. The study followed a qualitative approach to evaluate the implementation of multi grade teaching. A case study research design was followed with an interpretive paradigm to evaluate day to day offering of multi grade teaching. The population in this study consisted of principals and teachers who were selected through purposive sampling. Data were collected through focus group and face to face semi structured interviews as well as document analysis. Kolb's experiential learning theory was used as a theoretical framework for this study to evaluate the offering of multi grade teaching in case study schools. The thematic approach was used to analyse data. To ensure issues of ethical consideration, the researcher ensured that there is anonymity, confidentiality, informed consent, voluntary participation, participants' privacy and safety. The study found that schools in Sekhukhune South Education District could not offer multi grade teaching. This was mainly based on the lack of central policies on multi grade teaching as well as inappropriate teacher development programmes. Insufficient human and financial resources were also identified as key hindrances in the implementation of multi grade teaching. Resultantly, the study suggested that the serving teachers, their SMTs and their Curriculum Advisors must be provided with in service training on multi grade teaching. On the other hand, teacher training universities should have a compulsory module on multi grade teaching. The study also recommended the establishment of a DoBE unit that solely focuses on matters related to multi grade teaching. The study further recommended that the DoBE should develop central policies on multi grade teaching. It was also recommended that the DoBE's Post Provision Model and the National Norms and Standards for School Funding must be revised to cater for the needs of multi grade schools. The study further proposed a new framework to engender collaboration amongst principals, parents and Curriculum Advisors in school based multi grade policy formulation, advocacy training as well as monitoring and support.

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Human rights in diverse education contexts J.P. Rossouw, Elda de Waal, Johan Beckmann, Johan Botha, Franciska Bothma, André du Plessis, Elize Küng, Nicholas Mollo, Ewelina Niemczyk, Louise Postma, Erika Serfontein, Marius Smit, Charl C. Wolhuter, 2019-12-12 The focus of this publication is on answering the central research question How can Human Rights be advanced with regard to different kinds of diversities and in different educational settings The publication pays special attention to the advancement of human rights in a variety of education related contexts in keeping with human rights as a declared national priority for both society at large and the education system One strategic priority of the Faculty of Education is research based on market

requirements and needs This book strives towards meeting this expectation by directly aiming at building human rights and social justice in the South African society public schools and higher education institutions Adjudication in the education context of the constitutional values of dignity equality and freedom focusses regularly on learners The book highlights the value of education for full fledged citizenship by delineating what schooling should entail to inspire learners towards both claiming equal freedoms and rights and taking accountability for the responsibilities attached to citizenship

Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of

innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills
