Student Edition Grades 9-12 2017 Hughes-Hallett, 2019-03-11 Handbook of Research on Humanizing the Distance Learning Experience Northcote, Maria, Gosselin, Kevin P., 2016-11-08 Distance learning is becoming increasingly prevalent in educational settings around the world as it provides more flexibility and access to classes for students and educators alike. While online classrooms are proving to be popular, there is a significant gap in the personalization and humanization of these courses. The Handbook of Research on Humanizing the Distance Learning Experience features empirical research on promoting the personalization of online learning courses through presence, emotionality, and interactivity within digital classrooms. Highlighting best practices and evaluating student perceptions on distance learning, this handbook will appeal to researchers, educators, course designers, professionals, and administrators.

The China Order Fei-Ling Wang, 2017-08-07 Examines the rising power of China and Chinese foreign policy through a revisionist analysis of Chinese civilization. What does the rise of China represent, and how should the international community respond? With a holistic rereading of Chinese longue dure history, Fei Ling Wang provides a simple but powerful framework for understanding the nature of persistent and rising Chinese power and its implications for the current global order. He argues that the Chinese ideation and tradition of political governance and world order, the China Order, is based on an imperial state of Confucian Legalism, as historically exemplified by the Qin Han polity. Claiming a Mandate of Heaven to unify and govern the whole known world or tianxia, all under heaven, the China Order dominated Eastern Eurasia as a world empire for more than two millennia until the late nineteenth century. Since 1949, the People's Republic of China has been a reincarnated Qin Han polity without the traditional China Order, finding itself stuck in the endless struggle against the current world order and the ever-changing Chinese society for its regime survival and security. Wang also offers new discoveries and assessments about the true golden eras of Chinese civilization, explains the great East-West divergence between China and Europe, and analyzes the China Dream that drives much of current Chinese foreign policy. An original, important, well-researched, and powerfully argued exploration of the virtues and vices of the Chinese state from its ancient past to its likely future.

Edward Friedman, University of Wisconsin-Madison. A masterpiece, Wang provides a grand, sweeping, even epic review of two thousand years of Chinese history. His argument is compelling and well-documented; the richness and variety of sources, Chinese and English, he cites is breathtaking. The book is likely to end up on the reading list of every serious student of China's position in the world for many years to come.

Daniel C. Lynch, author of *China's Futures: PRC Elites Debate Economics, Politics, and Foreign Policy*. This imaginative and provocative grand tour of Chinese cosmological order and geopolitical strategy, past and present, is destined to become a classic.

Ming Xia, author of *The People's Congresses and Governance in China: Toward a Network Mode of Governance*.

Drowning by Accident Elizabeth Meinhard, 2022-02-15 Drowning By Accident explains why it is so easy to drown where accidents happen and how to save lives by early rescue and resuscitation More than 600 people die by drowning in Britain every year Swimming is promoted as a particularly safe form of exercise so that swimmers forget or ignore the dangers of frigid lakes swollen rivers incoming tides or outgoing rip currents Drowning accidents take place because we don t recognise water as a hostile environment We overestimate the strength and endurance of our bodies and underestimate the power and deceptiveness of water Year after year victims lose their lives in typical drowning accidents often sinking so quickly and silently that nearby family friends and onlookers fail to notice the tragedy taking place close beside them Babies drown in baths Toddlers drown in garden ponds School children fall off rafts Teenagers strike too far from the shore Pensioners wade into rivers to save their dogs Victims often die within minutes of sinking beneath the surface A quarter of those who reach hospital alive will also die while others survive with severe permanent brain damage This means that it is vitally important for parents grandparents teachers lifeguards and lawmakers to recognise the risks and prevent drowning accidents before they take place
