I. Front Part

- Title Page
- Signature
- Abstract
- Table of Contents
- (Optional) Acknowledgments, Copyright notifications, Dedications

II. Introduction

- Topic and the problem
- Thesis statement (research questions)
- Goal and significance of your investigation
- Terms (if any)
- Organization of your research

III. Literature Review

- Intro
- Background
- Review of the used sources
- Critical assessment

IV. Methodology

- Main questions
- Chosen research method
- Explanation of your methodology value
- Specification of procedures you applied to collect and analyze the data
- Limitations

V. Results

- The outcome of your findings
- Assumptions and hypothesis

VI. Summary

- Discussion of the results
- Comparison of the results with those of prior researchers
- Suggestions (how to use your obtained findings for future investigations)

Models of Sharing Graphs Masahito Hasegawa, 2012-12-06 Models of Sharing Graphs presents a sound mathematical basis for reasoning about models of computation involving shared resources including graph rewriting systems denotational semantics and concurrency theory An algebraic approach based on the language of category theory is taken throughout this work which enables the author to describe several aspects of the notion of sharing in a systematic way In particular a novel account of recursive computation created from cyclic sharing is developed using this framework Graph Theory for Operations Research and Management: Applications in Industrial Engineering Farahani, Reza Zanjirani, Miandoabchi, Elnaz, 2012-12-31 While typically many approaches have been mainly mathematics focused graph theory has become a tool used by scientists researchers and engineers in using modeling techniques to solve real world problems Graph Theory for Operations Research and Management Applications in Industrial Engineering presents traditional and contemporary applications of graph theory in the areas of industrial engineering management science and applied operations research This comprehensive collection of research introduces the useful basic concepts of graph theory in real world applications

Logic Synthesis for Asynchronous Controllers and Interfaces J. Cortadella, M. Kishinevsky, A. Kondratyev, Luciano Lavagno, Alex Yakovlev, 2012-12-06 This book is the result of a long friendship of a broad international co operation and of a bold dream It is the summary of work carried out by the authors and several other wonderful people during more than 15 years across 3 continents in the course of countless meetings workshops and discussions It shows that neither language nor distance can be an obstacle to close scientific cooperation when there is unity of goals and true collaboration When we started we had very different approaches to handling the mysterious almost magical world of asynchronous circuits Some were more theoretical some were closer to physical reality some were driven mostly by design needs In the end we all shared the same belief that true Electronic Design Automation research must be solidly grounded in formal models practically minded to avoid excessive complexity and tested in the field in the form of experimental tools The results are this book and the CAD tool petrify The latter can be downloaded and tried by anybody bold or desperate enough to tread into the clockless but not lawless domain of small scale asynchronicity The URL is <http://www.lsi.upc.es/rjordic/petrify> We believe that asynchronous circuits are a wonderful object that abandons some of the almost militaristic law and order that governs synchronous circuits to improve in terms of simplicity energy efficiency and performance *Dissertation Abstracts*

Dissertations in the Sciences Barbara E. Lovitts, Ellen L. Wert, 2023-07-03 This is one of three short booklets designed to be given to graduate students as they begin their studies They explain the purposes of the dissertation and the criteria by which it will be assessed They help students understand the context of their course work the need to take an active role in shaping their studies and the importance of thinking ahead about the components of the dissertation and the quality of scholarship they will need to demonstrate These booklets are intended to support the dissertation research and writing process by providing faculty and advisors with guidelines for setting clear expectations for student performance and with a model for helping students produce the desired quality of work They encourage dialogue between faculty and students about the quality of the components of their dissertation project They include rubrics that students can use to self assess their work and that can aid faculty in providing focused feedback Setting explicit targets and benchmarks of excellence of the sort advocated in these booklets will enable departments and universities to respond to demands for accountability with clear criteria for and evidence of success and will raise the overall quality of student performance Collection of foreign veterinary medical theses and dissertations ,1977 *Dissertation Abstracts* ,1962 Abstracts of dissertations and monographs in microform Network Flows and Matching David S. Johnson, Catherine C. McGeoch, Interest has grown recently in the application of computational and statistical tools to problems in the analysis of algorithms In many algorithmic domains worst case bounds are too pessimistic and tractable probabilistic models too unrealistic to provide meaningful predictions of practical algorithmic performance Experimental approaches can provide knowledge where purely analytical methods fail and can provide insights to motivate and guide deeper analytical results The DIMACS Implementation Challenge was organized to encourage experimental work in the area of network flows and matchings Participants at sites in the U S Europe and Japan undertook projects between November 1990 and August 1991 to test and evaluate algorithms for these problems The Challenge culminated in a three day workshop held in October 1991 at DIMACS This volume contains the revised and refereed versions of twenty two of the papers presented at the workshop along with supplemental material about the Challenge and the Workshop
