LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your group?

My criteria were: size, color, and shape of the lizards.

Did your teacher grade individual team efforts?

Yes, my teacher graded individual team efforts. She asked us to write a paper on the lizards we selected and to present our findings to the class.

An adaptation is a structure or function that the organism has as a response to its environment. The ability to survive and reproduce is a particular adaptation. Provide one example and an explanation of an adaptation of the lizard group.

One example of an adaptation is the ability to change color. This is a response to the environment. The lizards can change color to blend in with their surroundings.

Provide one evolutionary explanation for why lizards have the ability to change color (i.e., the group) would have survived a disadvantage.

One evolutionary explanation for why lizards have the ability to change color is that it is a response to the environment. The lizards can change color to blend in with their surroundings.
