LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your group?

My criteria were: size, color, and shape of the lizards.

Did your teacher grade individual team efforts?

Yes, my teacher graded individual team efforts. We were given a list of questions to answer and we had to choose between two different options for each question. We had to choose the best option for each question.

An adaptation is a structure or function that the organism has as a population because it increases the ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation of the green lizard.

The green lizard has a green color. This is an adaptation because it helps the lizard blend in with the green background. This is an adaptation because it helps the lizard survive and reproduce.

Provide one evolutionary explanation for why diversifying selection would favor stabilizing selection.

Stabilizing selection is a type of natural selection that favors the average phenotype and selects against the extreme phenotypes. This is an evolutionary explanation for why diversifying selection would favor stabilizing selection.
