

The HUBO D95 is a further development of the popular HUBO D90, but it does everything a better. Both cranes look very similar, but that's before the similarities cease.

The HUBO D95 features a new, low-headroom boom system with a separate telescopic cylinder on each extension, we have done away with all moving on the outer boom and telescopes and reduced the need for a hook attachment to just one - on the outer extension. All this leads to easier handling in confined areas and more larger loads. Consistently reduce friction and give smoother boom action.

The HUBO D95's working geometry has been optimized, resulting in better lifting capacity - in the upper lifting range, capacity has been boosted by over 10%. What's more, the D95 has an amazing close-in lifting height.

The HUBO D95 is a modern general cargo crane in the 10-ton capacity class that offers excellent maneuverability. Choose between crane controls, HUBO's well-known "joystick" version with the new computerized, 3D or 2D remote-controlled "joystick" with HUBO's new 3D and 2D-3D or control platforms.

The design solution entails bending the oil for the hydraulic cylinders through the cylinder control, which allows for an endless number of using oil the better boom.

The HUBO D95 is a further development of the popular HUBO D90, but it does everything a better. Both cranes look very similar, but that's before the similarities cease.

A platform to operate and work with the ControlD95 3D remote control, or as shown here, the new advanced ControlD95.
