**A New Representation of Chinese Learners** Yingmei Luo, 2021-07-26 This book examines Chinese tertiary students' experiences of learning English in Sino-Australian programs in China Using an institutional ethnography the book examines one well-established Sino-Australian program based at a Chinese university The book explores the ways that participant students used the Chinese words tropes and their meanings to describe their English learning experiences with both local Chinese and foreign English teachers This book introduces an innovative theoretical framework representation theory with a multilingual perspective to analyse how Chinese students' everyday experiences are constructed and mediated through language discourse and identity This framework also highlights graphic examples of how concepts are created in both Chinese and English and thus serves as a powerful tool for deconstructing dichotomies between China and the West The aim

of this book is then two fold to show how a novel theoretical lens can help us to develop more nuanced understandings of Chinese students and to propose a new methodological and theoretical framework through which one can challenge the monolingual subjectivity and parochial views of both Chinese and Western conceptions      **People in Action** Susan Ogier, 2009 Designed for elementary students this series inspires creativity based on observations and sensory perceptions Famous works of art and art history introduce thoughtful projects Covering techniques for textiles landscapes depicting movement and using found objects in art these books are sure to inspire young artists      *Tearing Down the Gates* Peter Sacks, 2007 Tearing Down the Gates is a superb book which exposes the dirty little secret of American education that while our public schools and universities are meant to be engines for social mobility they too often reinforce stratification Peter Sacks is one of the great storytellers of American inequality interweaving devastating statistics with poignant stories of individuals he came to know well in his reporting While much of the literature on inequality rightfully tackles the barriers of race and gender Sacks digs deeper laying bare the taboo reality of social class in America Richard D Kahlenberg Senior Fellow The Century Foundation and author of *The Remedy Class Race and Affirmative Action* Peter Sacks has been relentless in his writings that we as a nation are failing in our responsibility to provide access to a quality education for our poorest citizens In his latest work *Tearing Down the Gates* he provides compelling data and anecdotes to drive home the stark reality that our higher education system is not accessible to low income students in the same way that it is for students from more affluent families He challenges the education community in particular and all of our democratic institutions in general to remove the barriers that keep motivated low income citizens from succeeding Not only is it the right thing to do our country's societal and economic survival may depend on it William D Boyd Senior Associate Vice President Student Affairs San Diego State University Peter Sacks pulls no punches in pointing out the hypocrisy and resulting tragedy of our society's educational inequities puncturing our self serving belief in meritocracy that is not quite that The results of his study will be controversial but the topic could not be more pressing for all of us and for the future of our democracy and economy Anthony W Marx President Amherst College Peter Sacks has written a compelling account of the ways in which class determines educational opportunity Made vivid by anecdotes supported by socioeconomic data *Tearing Down the Gates* will give anyone concerned with higher education much food for thought about the ways in which our colleges reinforce class privilege failing to provide the equal opportunity we value so highly Carol T Christ President Smith College A powerful timely and richly documented work on the stunning disparities in success and opportunity along the lines of class and race that undermine the promises of democratic education in America Drawing upon vivid personal experience Sacks brings a close lens to bear upon allegedly progressive institutions such as the Berkeley California public schools and demonstrates the enduring contradiction between high ideals annunciated by a liberal community and the actual behavior of the parents of the privileged who go to school in such communities In a valiant effort to open up an avenue of hope the author identifies schools and universities that have

attempted to tear down the gates which have perpetuated caste divisions in our nation and its pedagogic institutions but in clear sighted recognition of the potent backlash on the part of these who fervently defend inequities which benefit their children This very important and disturbing book reminds us of the struggle still ahead Jonathan Kozol author of The Shame of the Nation The Restoration of Apartheid Schooling in America In the spirit of Jonathan Kozol s writing on K 12 education Peter Sacks carries the story of inequity social stratification and unequal opportunities to the domain of higher education While the story has been described by statisticians Sacks puts a human face on the disparities in opportunity by socioeconomic class through revealing portraits of individual young people from widely differing circumstances and the vastly different educational opportunities they face It is hardly surprising that as education has grown sharply in economic value wealthy parents will do whatever it takes to give their children every educational advantage what has not caught up to reality is our continuing belief that all children have equal opportunity One example of the punch of this book is his treatment of Berkeley High School where even in this most liberal of cities the wealthy have found ways to advantage their young A must read for all who care about the future shape of civil society in this country David Breneman University of Virginia
