

TO STOP ENGINE

1. To stop engine, move throttle control lever to OFF position.
2. Disconnect spark plug wire and ground to prevent accidental starting while equipment is unattended.

IMPORTANT: Open the large zipper to empty the bag. Be certain the zipper is closed when operating the unit. See figure 5.

FIGURE 5.

OPERATING THE CHIPPER

Do not attempt to shred or chip any material other than vegetation found in a normal yard (i.e., branches, leaves, twigs, etc.). Material such as stalks or heavy branches up to 2" in diameter may be fed into the chipper chute. See figure 6.

FIGURE 6.

WARNING: Material up to a maximum of 2" in diameter may be fed into the chipper chute. Do not attempt to shred or chip any material larger than 2" in diameter. Personal injury or damage to the machine could result.

IMPORTANT: There is a flail screen located inside the housing in the discharge area. If the flail screen becomes clogged, remove and clean as instructed in the Maintenance section on page 8. For best performance, it is important to keep the chipper blades sharp. Refer to Maintenance section, page 8. If the composition of the material being discharged changes (becomes stringy, etc.) or if the rate at which the material is discharged slows down considerably, it is likely that the chipper blades are dull and need to be sharpened or replaced.

ADJUSTMENTS

WARNING: Do not at any time make any adjustment to the unit without first stopping engine and disconnecting spark plug wire.

FRONT CASTER WHEELS

Your chipper-shredder-vacuum is equipped with caster front wheels. The casters can be locked in a straight ahead position or can be left to swivel freely. Lift and place pins in the larger holes for locked, straight ahead operation. Place pins in smaller holes to allow casters to rotate freely. See figure 7. Lock wheels in straight position when operating on slopes.

FIGURE 7.

NOZZLE DOOR HEIGHT ADJUSTMENT

The nozzle door can be adjusted to any of five positions, ranging from 1/2" to 3" ground clearance. See figure 8. The nozzle door height has to be adjusted according to the conditions.

Slide the height adjustment lever forward or backward for adjusting the nozzle door upwards or downwards.

NOTE: In general, raise the nozzle height to vacuum a thick layer of leaves; lower the nozzle height for smoother surfaces.
