

The background of the page is a collage of aviation-related images. It features several large, semi-transparent analog flight instruments, including an attitude indicator with a horizon line and 'L'/'R' labels, a heading indicator with a lightning bolt symbol, and a speedometer. A small, blue and white propeller airplane is shown flying in a blue sky with white clouds. The overall theme is instrument flying.

## Chapter 6, Section I

# Airplane Attitude Instrument Flying

## Using Analog Instrumentation

### Introduction

Attitude instrument flying is defined as the control of an aircraft's spatial position by using instruments rather than outside visual references. Today's aircraft come equipped with analog and/or digital instruments. Analog instrument systems are mechanical and operate with numbers representing directly measurable quantities, such as a watch with a sweep second hand. In contrast, digital instrument systems are electronic and operate with numbers expressed in digits. Although more manufacturers are providing aircraft with digital instrumentation, analog instruments remain more prevalent. This section acquaints the pilot with the use of analog flight instruments.
