Creativity, innovation and entrepreneurship: the learning science towards higher order abilities Zehui Zhan,Patrick S. W. Fong,Harrison Hao Yang,Kuen-Yi Lin,Baichang Zhong,2023-01-03

Society, Organizations and the Brain: building towards a unified cognitive neuroscience perspective Carl Senior,Nick Lee,Sven Braeutigam,2015-07-02 This e book brings together scholars in both the neurosciences and organizational sciences who have adopted various approaches to study the cognitive mechanisms mediating the social behavior that we see within

organizations Such an approach has been termed by ourselves and others as organisational cognitive neuroscience In recent years there has been a veritable increase in studies that have explored the cognitive mechanisms driving such behaviors and much progress has been made in understanding the neural underpinnings of processes such as financial exchange risk awareness and even leadership However while these studies are informative and add to our understanding of human cognition they fall short of providing evidence based recommendations for practice Specifically we address the broader issue of how the neuroscientific study of such core social behaviors can be used to improve the very way that we work To address these gaps in our understanding the chapters in this book serve as a platform that allows scholars in both the neurosciences and the organizational sciences to highlight the work that spans across these two fields The consolidation of these two fields also serves to highlight the utility of a singular organizational cognitive neuroscience This is a fundamentally important outcome of the book as the application of neuroscience to address economically relevant behaviors has seen a variety of fields evolve in their own right such as neuromarketing neuroeconomics and so forth The use of neuro scientific technologies in particular fMRI has indeed led to a bewildering and somewhat suffocating proliferation of new approaches however the speed of such developments demands that we must proceed carefully with such ventures or risk some fundamental mistakes The book that you now hold will consolidates these new neuroscience based approaches and in doing so highlight the importance of this approach in helping us to understand human social behavior in general Taken together the chapters provide a framework for scholars within the neurosciences who wish to explore the further the opportunities that the study of organisational behavior may provide Deeper Learning, Dialogic Learning, and Critical Thinking Emmanuel

Manalo,2019-09-12 Deeper learning dialogic learning and critical thinking are essential capabilities in the 21st century environments we now operate Apart from being important in themselves they are also crucial in enabling the acquisition of many other 21st century skills capabilities such as problem solving collaborative learning innovation information and media literacy and so on However the majority of teachers in schools and instructors in higher education are inadequately prepared for the task of promoting deeper learning dialogic learning and critical thinking in their students This is despite the fact that there are educational researchers who are developing and evaluating strategies for such promotion The problem is bridging the gap between the educational researchers work and what gets conveyed to teachers and instructors as evidence based usable strategies This book addresses that gap in it leading scholars from around the world describe strategies they have developed for successfully cultivating students capabilities for deeper learning and transfer of what they learn dialogic learning and effective communication and critical thought They explore connections in the promotion of these capabilities and they provide in accessible form research evidence demonstrating the efficacy of the strategies They also discuss answers to the questions of how and why the strategies work A seminal resource this book creates tangible links between innovative educational research and classroom teaching practices to address the all important question of how we can realize our ideals

for education in the 21st century It is a must read for pre service and in service teachers teacher educators and professional developers and educational researchers who truly care that we deliver education that will prepare and serve students for life
