Biomedical Applications of Functionalized Nanomaterials Concepts Development and Clinical Translation presents a concise overview of the most promising nanomaterials functionalized with ligands for biomedical applications The first section focuses on current strategies for identifying biological targets and screening of ligand to optimize anchoring to nanomaterials providing the foundation for the remaining parts Section Two covers specific applications of functionalized nanomaterials in therapy and diagnostics highlighting current practice and addressing major challenges in particular case studies of successfully developed and marketed functionalized nanomaterials The final section focuses on regulatory issues and clinical translation providing a legal framework for their use in biomedicine This book is an important reference source for worldwide drug and medical devices policymakers biomaterials scientists and regulatory bodies Provides an overview of the methodologies for biological target identification and ligand screening Includes case studies showing the development of functionalized nanomaterials and their biomedical applications Highlights the importance of functionalized nanomaterials for drug delivery diagnostics and regenerative medicine applications

John the Baptizer and Prophet Robert L.

Webb,1991-08-01 Using recent methodological advances in historical Jesus research this book examines the figure of John by focusing on the two characteristic roles which he publicly performed baptizer and prophet The significance of these roles is studied within the context of late Second Temple Judaism in order to understand John within his social and historical context Part I examines the traditions concerning John in Josephus s Antiquities as well as in canonical and extra canonical Gospels Part II studies John s role as baptizer by analysing the functions of ablutions in the Old Testament and Second Temple Jewish literature especially the Qumran literature Part III analyses John s public role of prophet John is seen as the leader of a prophetic movement whose sociopolitical orientation may be compared with similar movements of the period

New Perspectives on the Biology of Nectaries and Nectars Clay Carter,Robert W. Thornburg,Massimo Nepi,2019-08-27 The number of currently known described and accepted plant species is ca 374 000 of which approximately 295 00 79% are angiosperms Almost 90% of this huge number of flowering plants is pollinated by animals mostly insects via nectar mediated interactions Notably three fourths of the leading global crop plants produce nectar and are animal pollinated which is estimated to account for one third of human food resources Nectar can also be produced on tissues outside of flowers by so called extrafloral nectaries and commonly mediate interactions with body guard ants and other pugnacious insects that defend the plant from herbivores Extrafloral nectar is present in almost 4 000 plant species a majority of them in the angiosperms This brief summary on the occurrence of nectar in the plant kingdom is just to highlight that nectar has a fundamental role in two basal functions that allow the maintenance of our ecosystems sexual plant reproduction and protection of plants from herbivory Despite playing essential ecological and evolutionary functions our current knowledge about nectar is largely incomplete however new research directions and perspectives on nectaries and nectars have arisen in recent years In the last two decades there were only a few moments in which nectar was the main character in international

meetings or in published books In 2002 the first and only international meeting Nectar and nectary from biology to biotechnology dedicated exclusively to nectar and nectaries was held in Italy Montalcino Siena and in 2003 the proceedings were published in a special volume of Plant Systematics and Evolution 238 issue 1 4 In 2007 the book Nectar and Nectaries was published Springer with most of the contributions provided by authors that attended the meeting in Italy Another book dedicated to nectar was published in 2015 Nectar Production Chemical Composition and Benefits to Animals and Plants Nova Science Publishers covering aspects mainly related to nectar chemical composition and plant pollinator interactions Similarly symposia focused on nectar have been organized within the International Botanical Congress in 2011 and 2017 Considering that the last few years has yielded essential developments in the understanding of nectar biology we thought now is the moment to further stimulate research on this important topic This aim has been met through 18 papers published in our Research Topic New Perspectives on the Biology of Nectaries and Nectars with subjects spanning evolution and ecology to nectar chemistry and nectary structure
