Duncan, Derek Moscato, 2025-07-10 This edited volume brings together scholars teachers journalists activists and filmmakers engaged in environmental communication and media studies to explore the

constructions of primitive and wild spaces in our cultural creations of film television advertising social media infrastructure and new technologies among other media Contributors present close analyses of a number of examples including Indigenous social media activism National Geographic VanLife content Japanese haikyo and more to examine the representation commodification exploitation and politicization of primitive and wild natural areas in contemporary media and technology Ultimately this collection demonstrates that while the media of wild representations have significantly changed since the days of our ancestors the same themes of reverence fear beauty power and awe are still reflected and coopted Scholars of environmental studies communication popular culture technology studies and media studies will find this book of particular interest

A High-Rate Virtual Instrument of Marine Vehicle Motions for Underwater Navigation and Ocean Remote Sensing Chrystel Gelin, 2012-08-22 Dead Reckoning aided with Doppler velocity measurement has been the most common method for underwater navigation for small vehicles Unfortunately DR requires frequent position recalibrations and underwater vehicle navigation systems are limited to periodic position update when they surface Finally standard Global Positioning System GPS receivers are unable to provide the rate or precision required when used on a small vessel To overcome this a low cost high rate motion measurement system for an Unmanned Surface Vehicle USV with underwater and oceanographic purposes is proposed The proposed onboard system for the USV consists of an Inertial Measurement Unit IMU with accelerometers and rate gyros a GPS receiver a flux gate compass a roll and tilt sensor and an ADCP Interfacing all the sensors proved rather challenging because of their different characteristics The proposed data fusion technique integrates the sensors and develops an embeddable software package using real time data fusion methods for a USV to aid in navigation and control as well as controlling an onboard Acoustic Doppler Current Profiler ADCP While ADCPs non intrusively measure water flow the vessel motion needs to be removed to analyze the data and the system developed provides the motion measurements and processing to accomplish this task
