

How to install packages in R ?

Option 1: Using Code

Install the package

- `install.packages("package_name")`
- package name should be in quotes (single or double)

For Example:

```
#Install ggplot2 package  
install.packages("ggplot2")  
  
#Install tidyr package  
install.packages("tidyr")
```

Load the package

- Once the packages are installed, we need to load the packages using the `library(package_name)` command
- while loading package name should not be in quote

Privacy and Anonymity in Information Management Systems Jordi Nin, Javier Herranz, 2010-07-16 As depicted in David Lodge's celebrated novel Small World the perceived size of our world experienced a progressive decrease as jet airplanes became affordable to ever greater shares of the earth's population Yet the really dramatic shrinking had to wait until the mid 1990s when Internet became widespread and the information age stopped being an empty buzzword But small is not necessarily beautiful We now live in a global village and alas some often very powerful voices state that we ought not expect any more privacy in it Should this be true we would have created our own nightmare a global village combining the worst of conventional villages where a lot of information on an individual is known by the other villagers and conventional big cities where the individual feels lost in a grim and potentially dangerous place Whereas security is essential for organizations to survive individuals and so times even companies also need some privacy to develop comfortably and lead a free life This is the reason why individual privacy is mentioned in the Universal Declaration of Human Rights 1948 and data privacy is protected by law in most Western countries Indeed without privacy the rest of fundamental rights like freedom of speech and democracy are impaired The outstanding challenge is to create technology that implements those legal guarantees in a way compatible with functionality and security This book edited by Dr Javier Herranz and Dr
