This book offers a comprehensive exploration of the intersection of urban planning, transportation technology, and smart city development. With a keen focus on sustainability and the potential for positive change, it presents a collection of diverse chapters that shed light on emerging trends and innovative solutions in the field. The book examines the role of urban ropeways as both a public transport service and a catalyst for touristic development, highlighting their potential benefits and challenges. It also introduces novel approaches to measuring accessibility and transportation potential using Space Syntax and Geographic Information Systems (GIS), providing valuable insights for urban planners and policymakers. The chapters delve into specific areas of study, such as the driving behavior of individuals with high-functioning autism spectrum disorder, the mobility challenges faced by women in developing countries, and alternative methods of snow and ice removal in parking areas through hydronic heating. Furthermore, the book explores the intersection of sustainability, smart cities, and global travel, considering the impact of aviation on climate change and the potential of digital humanism in the metaverse. It also examines the implications and challenges of cultural biases in smart city development, emphasizing the need for inclusive and culturally sensitive approaches. The integration of Internet of Things (IoT) in housing is discussed, focusing on the domotization of sustainable walls and their potential benefits for energy efficiency and sustainable living. The use of immersive technologies in virtual heritage is explored, showcasing innovative tourist experiences and highlighting the case of the Berati Ethnographic Museum. The book also addresses the potential of web mapping applications for smart city development, the behavioral attitudes toward ridesharing, and mode preferences of shared automated electric vehicles. The development of wind turbine systems for vehicle battery recharging and the application of knowledge-driven problem identification in transformative city design and development are also covered. *Smart City Innovations* serves as a valuable resource for researchers, professionals, policymakers, and anyone interested in the future of urban planning, transportation, and smart cities. By addressing pressing challenges and presenting innovative solutions, this book aims to inspire positive change and contribute to the creation of sustainable and livable urban environments.
