Minerva 80 Manual:

The Redemptive Work A. Kim Clark, 1998 At the turn of the century diverse political economic and social conditions divided Ecuador During the construction of the Guayaquil Quito Railway the people of Ecuador faced the challenge of working together The Redemptive Work Railway and Nation in Ecuador 1895 1930 examines local regional and national perspectives on the building of the railway and analyzes the contradictory processes of national incorporation The elite landowners of the highlands were concerned with the transportation of their agricultural products to the coast while the agro export elite of the coast were more interested in forming a labor market Because the underlying objectives were contradictory only a partial consensus was reached on the nature of national development The Redemptive Work is the first text to deal with these complex issues in Ecuador s history It is useful for undergraduate and graduate courses in Latin American history social history anthropology political science and nation and state formation

United States. Bureau of Education, 1909 *Minding the Machine* Stephen P. Rice, 2004-08-30 In this innovative book Stephen P Rice offers a new understanding of class formation in America during the several decades before the Civil War This was the period in the nation s early industrial development when travel by steamboat became commonplace when the railroad altered concepts of space and time and when Americans experienced the beginnings of factory production These disorienting changes raised a host of questions about what machinery would accomplish Would it promote equality or widen the distance between rich and poor Among the most contentious questions were those focusing on the social consequences of mechanization while machine enthusiasts touted the extent to which machines would free workers from toil others pointed out that people needed to tend machines and that that

work was fundamentally degrading and exploitative *Minding the Machine* shows how members of a new middle class laid claim to their social authority and minimized the potential for class conflict by playing out class relations on less contested social and technical terrains As they did so they defined relations between shopowners and the overseers foremen or managers they employed and wage workers as analogous to relations between head and hand between mind and body and between human and machine Rice presents fascinating discussions of the mechanics institute movement the manual labor school movement popular physiology reformers and efforts to solve the seemingly intractable problem of steam boiler explosions His eloquent narrative demonstrates that class is as much about the comprehension of social relations as it is about the making of social relations and that class formation needs to be understood not only as a social struggle but as a conceptual struggle
