### *Autoimmuno-Anti-Tumour Immunity (AATI) - Understanding the Immune Responses against “Self” & “Altered-self”*

Fang-Ping Huang, 2017-05-16 The brief description of tumours being wounds that do not heal by Dr Harold F Dworak nearly three decades ago N Engl J Med 1986 has provided not only a vivid illustration of neoplastic diseases in general but also in retrospect conceptually a plausible immunological definition of cancers Based on our current understanding in the field it could have even a multi dimensional meaning attached with This relates to several important issues which need to be addressed further i e in terms of a close link between chronic inflammation and tumourigenesis widely observed clinical and experimental evidence of immunity against tumours versus the highly immunosuppressive tumour microenvironment being associated and their underlying immunological mechanisms oncogenic basis as well as the true causal relationship in question Recent findings from studies into the pathogenesis of autoimmunity and more importantly the mechanisms which protect against it have offered some new insights for our understanding in this direction Chronic or persistent autoimmune like inflammatory conditions are evidently associated with tumor development The important question is about their true causal relationship Chronic or persistent inflammation has been shown to contribute directly to tumour development by triggering neoplastic transformation and production of inflammatory mediators which could promote cancer cell survival proliferation and invasion On the other hand tumours are mutated self tissue cells to which the host immune system is largely tolerized otherwise Although the mutations may give rise to the expression of tumour specific antigens TSA or tumour associated antigens TAA most of these TSAs TAAs are found to be poor immunogens The ongoing inflammatory conditions may therefore reflect a desperate attempt of the host immune system to mount anti tumour responses though ineffectively being a consequence of the continuous yet largely futile triggering by those poorly immunogenic TSAs TAAs Furthermore during autoimmune or overtly persistent immunological responses many regulatory mechanisms are triggered in the host in attempts to limit the ongoing harmful inflammatory reactions Such a negative feedback regulation is known to be crucial in preventing normal individuals from immune mediated diseases As a result of the negative feedback loop however an excessive production of anti inflammatory or immunosuppressive molecules followed by the exhaustion of the immune effector cells may instead lower the ability of the host immune system to mount specific anti tumor responses allowing the escape of tumour or mutated cells from immunosurveillance This may also help to explain why the most effective way to enhance host immunity against cancer is by targeting the negative arm of immune regulation In this Frontiers Research Topic we aim to gather current views from experts in these inherent overlapping fields of oncology autoimmunity and tumour immunology and to make them available to our potential readership who may be particularly interested in this cutting edge area By understanding how the immune system is normally regulated why dysregulation of which may cause the immunological oncological related diseases we also encourage further discussions as to how the so called self reactivity

autoimmune responses can be alternatively switched on and redirected immunologically or molecularly for effective cancer treatment

**Fostering Scientific Citizenship in an Uncertain World** Graça S. Carvalho, Ana Sofia Afonso, Zélia Anastácio, 2023-07-18 This edited volume brings together innovative research in the field of Science Education fostering scientific citizenship in an uncertain world The nineteen chapters presented in this book address diverse topics and research approaches carried out in various contexts and settings worldwide contributing to improving and updating knowledge on science education The book consists of selected high quality studies presented at the 14th European Science Education Research Association ESERA Conference held online due to the Covid 19 pandemic by the University of Minho Portugal between August 30th and September 3rd 2021 Being of great relevance in contemporary science education this book stimulates reflection on different approaches to enhance a deeper understanding of how better prepare the coming generations which is of great interest to science education researchers and science teachers

**Nanotechnology Applications in the Food Industry** V Ravishankar Rai, Jamuna A

Bai,2018-01-31 Nanotechnology is increasingly used in the food industry in the production processing packaging and preservation of foods It is also used to enhance flavor and color nutrient delivery and bioavailability and to improve food safety and in quality management Nanotechnology Applications in the Food Industry is a comprehensive reference book containing exhaustive information on nanotechnology and the scope of its applications in the food industry The book has five sections delving on all aspects of nanotechnology and its key role in food industry in the present scenario Part I on Introduction to Nanotechnology in Food Sector covers the technological basis for its application in food industry and in agriculture The use of nanosized foods and nanomaterials in food the safety issues pertaining to its applications in foods and on market analysis and consumer perception of food nanotechnology has been discussed in the section Part II on Nanotechnology in Food Packaging reviews the use of nanopolymers nanocomposites and nanostructured coatings in food packaging Part III on Nanosensors for Safe and Quality Foods provides an overview on nanotechnology in the development of biosensors for pathogen and food contaminant detections and in sampling and food quality management Part IV on Nanotechnology for Nutrient Delivery in Foods deals with the use of nanotechnology in foods for controlled and effective release of nutrients Part V on Safety Assessment for Use of Nanomaterials in Food and Food Production deliberates on the benefits and risks associated with the extensive and long term applications of nanotechnology in food sector

*Social and Behavioral Science for Health Professionals* Brian P. Hinote,Jason Adam Wasserman,2019-12-26 Health professionals interest in social and behavioral science is rapidly increasing due to the growing recognition that social factors such as income education race gender and age all impact individuals health These and other social conditions also shape patients illness experiences the ways that they interact with health care providers and the effectiveness of with which health professionals provide care Understanding these social determinants and applying them to clinical practice is a major challenge for healthcare providers which is why programs and accrediting bodies have been including more social and behavioral science content into the curricula for medical nursing and allied health programs *Social and Behavioral Science for Health Professionals* provides in depth coverage of the social determinants of health and how to directly apply these insights in clinical practice thereby enhancing clinicians ability to engage their patients and more effectively render care Broken into four parts the book opens with the foundations of social science and health including the shifting landscape of health and healthcare The authors then cover the way in which social determinants of health shape large scale features of health and illness in society how they influence interactions between patients and providers in clinical settings and how they shape health care systems and policies Threshold concepts in each chapterfocus on conceptual and transformative learning while learning objectives activities and discussion questions provide instructors and students with robust sets of learning aids that intentionally focus on practical clinical epidemiological and policy issues Ideal for students educators and professionals in health care medical sociology public health and related fields *Social and Behavioral Science for Health Professionals* is the

only introduction available that clearly articulates why social and behavioral science matter in clinical care New to This Edition New Chapter 13 on Comparative Health Care Systems covers four models of health care systems and expands the global focus of the book Greater emphasis on the LGBTQ community provides coverage of how gender expression and sexual orientation influence health and quality of care received New coverage of current issues such as the opioid crisis and vaccine hesitancy that have been rendered especially important by the COVID 19 pandemic Added discussion questions at the end of every chapter strengthen students critical thinking skills and abilities to apply new insights to practical real world examples

Principles of Neuro-Oncology Alejandro Monroy-Sosa, Srikant S. Chakravarthi, Jaime G. de la Garza-Salazar, Abelardo Meneses Garcia, Amin B. Kassam, 2020-12-23 This book provides a comprehensive overview of the management of brain and skull base tumors It features detailed insight into the intrinsic molecular biology anatomical foundation radiological planning surgical execution and the novel therapeutics that guide today's treatment regimens The first section features concepts related to the epidemiology and pathological basis of disease processes including relevant cellular and molecular biology In the second section integral anatomical foundations and principles are covered including microsurgical anatomy of the cerebrum white matter tracts ventricles brainstem skull base advancements in radiological imaging and cognitive examinations Surgical approaches and how to execute these procedures are then subsequently discussed in the third part of the work Principles of Neuro Oncology Brain Skull Base is a practically applicable guide to the latest treatment techniques available to treat these patients Therefore it is an indispensable resource for all physicians who utilize these methodologies in their day to day practice *Novel Diagnostic and Therapeutic Strategies in the Management of Cerebral Gliomas* Valeria Barresi, Maria Caffo, Giuseppe Lombardi, Letteria Minutoli, Emeline Tabouret, Herui Wang, 2024-10-29 Cerebral gliomas account for 45% of all primary central nervous system CNS tumors The median survival after the initial diagnosis of glioblastoma GBM is only 15 months and less than 10% of patients survive three years post diagnosis Surgical treatment followed by adjuvant therapies such as radiotherapy and chemotherapy represents the classical strategy in glioma management The revised WHO 2016 classification now distinguishes the oligodendrogliomas with 1p19q codeletion and IDH mutation from the astrocytomas with or without IDH mutations thereby creating homogenous and pathologically distinct subgroups While the status of gene expression and mutations define components of GBM subtypes it was also found that response to therapies was different for each subtype suggesting that personalized treatment based on genomic alterations could lead to a more favorable outcome for this disease **Medicine Sciences and Bioengineering** Mings
