Karim Sadeghi, Dan Douglas, 2023-04-27 *Fundamental Considerations in Technology Mediated Language Assessment* aims to address issues such as how the forced integration of technology into second language assessment has shaped our understanding of key traditional concepts like validity reliability washback authenticity ethics fairness test security and more Although computer assisted language testing has been around for more than two decades in the context of high stakes proficiency testing much of language testing worldwide has shifted to at home mode and relies heavily on the mediation of digital technology making its widespread application in classroom settings in response to the COVID 19 outbreak unprecedented Integration of technology into language assessment has brought with it countless affordances and at the same time challenges both theoretically and practically One major theoretical consideration requiring attention is the way technology has contributed to a reconceptualization of major assessment concepts constructs There is very limited literature available on the theoretical underpinnings of technology mediated language assessment This book aims to fill this gap This book will appeal to academic specialists practitioners or professionals in the field of language assessment advanced and or graduate students and a range of scholars or professionals in disciplines like educational technology applied linguistics and teaching English to speakers of other languages TESOL

Behind the Fog Lisa Martino-Taylor, 2017-07-28 *Behind the Fog* is the first in depth comprehensive examination of the United States Cold War radiological weapons program The book examines controversial military sponsored studies and field trials using radioactive simulants that exposed American civilians to radiation and other hazardous substances without their knowledge or consent during the Cold War Although Western biological and chemical weapons programs have been analyzed by a number of scholars *Behind the Fog* is a strong departure from the rest in that the United States radiological weapons program has been generally unknown to the public Martino Taylor documents the coordinated efforts of a small group of military scientists who advanced a four pronged secret program of human subject radiation studies that targeted unsuspecting Americans for Cold War military purposes Officials enabled such projects to advance through the layering of secrecy by embedding classified studies in other studies and through outright deception Agency and academic partnerships advanced supported and concealed the studies from the public at large who ultimately served as unwitting test subjects Martino Taylor s comprehensive research illuminates a dark chapter of government secrecy the military industrial academic complex and large scale organizational deviance in American history In its critical approach *Behind the Fog* effectively examines the mechanisms that allow large scale elite deviance to take place in modern society

Transcultural Justice at the Tokyo Tribunal , 2018-03-06 While the International Military Tribunal at Nuremberg has been at the centre of scholarly attention the Tokyo Tribunal has for decades been largely neglected This is surprising insofar as this tribunal was a well organized Allied endeavour and prefigured the international courts and tribunals of our day Eleven national teams were sent to Tokyo between 1946 and 1948 to bring about justice in the aftermath of the Pacific War This volume offers an innovative approach to the Tokyo Tribunal as an arena of transcultural engagement

The Crime of Conspiracy in International Criminal Law Juliet R. Amenge Okoth, 2014-05-13 This book looks at the relevance of conspiracy in international criminal law. It establishes that conspiracy was introduced into international criminal law for purposes of prevention and to combat the collective nature of participation in commission of international crimes. Its use as a tool of accountability has however been affected by conflicting conceptual perceptions of conspiracy from common law and civil law countries. This conflict is displayed in the decisions on conspiracy by the international criminal tribunals and finally culminates into the exclusion of punishment of conspiracy in the Rome Statute. It is questionable whether this latest development on the law of conspiracy was a prudent decision. While the function of conspiracy as a mode of liability is satisfactorily covered by the modes of participation in the Rome Statute, its function as a purely inchoate crime used to punish incomplete crimes is missing. This book creates a case for inclusion in the Rome Statute. punishment of conspiracies involving international crimes that do not extend beyond the conceptual stage to reinforce the Statute's purpose of prevention. The conspiracy concept proposed is one that reflects the characteristics acceptable under both common law and civil law systems. *Australian Private International Law for the 21st Century* Andrew Dickinson, Mary Keyes, Thomas John, 2014-11-20 A nation's prosperity depends not only on the willingness of its businesses to export goods and services and of its citizens and residents to travel to take advantage of opportunities overseas but also on the willingness of the businesses and citizens of other nations to cross the nation's borders to do business. Economic expansion and parallel increases in tourism and immigration have brought Australians more frequently into contact with the laws and legal systems of other nations. In particular in recent years trade with partners in the Asia Pacific Region has become increasingly important to the nation's future. At the same time Australian courts are faced with a growing number of disputes involving foreign facts and parties. In recognition of these developments and the need to ensure that the applicable rules meet the needs both of transacting parties and society the Attorney General's Department launched in 2012 a full review of Australian rules of private international law. This collection examines the state and future of Australian private international law against the background of the Attorney General's review. The contributors approach the topic from a variety of perspectives: judge, policy maker, practitioner, academic and with practical and theoretical insights as to operation of private international law rules in Australia and other legal systems.
