Assessment for Experiential Learning Cecilia Ka Yuk Chan, 2022-09-29 Chan s book explores the challenges in assessing experiential learning deepens our understanding and inspires readers to think critically about the purpose of assessment in experiential learning Experiential learning has been studied and proven to be effective for student learning particularly for the development of holistic competencies i e 21st century skills soft skills transferable skills considered essential for individuals to succeed in the increasingly global and technology infused 21st century society Universities around the world are now actively organising experiential learning activities or programmes for students to gain enriching and diversified learning experiences however the assessment of these programmes tends to be limited unclear and contested Assessment plays a central role in education policies and students approach to learning But do educators know how to assess less traditional learning such as service learning entrepreneurship cross discipline or cross cultural projects internships and student exchanges While the current assessment landscape is replete with assessments that measure knowledge of core content areas such as mathematics law languages science and social studies there is a lack of assessments and research that focus on holistic competencies How do we assess students ability to think critically problem solve adapt self manage and collaborate Central to the discussion in this book is the reason students are assessed and how they should be assessed to bring out their best learning outcomes Offering a collection of best assessment practice employed by teachers around the world this volume brings together both theoretical and empirical research that underpins assessment and perceptions of different stakeholders understanding of assessment in experiential learning from students teachers and policymakers The idea of assessment literacy also plays an important role in experiential learning for example reflection is often used in assessing students in experiential learning but how reflection literate are educators are they aware of the ethical dilemmas

that arise in assessing students These questions are discussed in detail The volume also introduces a quality assurance programme to recognise student development within experiential learning programmes The book will be particularly informative to academic developers teachers students and community partners who struggle with the development and assessment for experiential learning those who plan to apply for funding in experiential learning and policymakers and senior managements seeking evidence and advice on fine tuning curricular assessment designs and quality assurance The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Treatise on Geomorphology, 2013-02-27 The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of discipline The number of peer reviewed papers published in geomorphic journals has grown steadily for more than two decades and more importantly the diversity of authors with respect to geographic location and disciplinary background geography geology ecology civil engineering computer science geographic information science and others has expanded dramatically As more good minds are drawn to geomorphology and the breadth of the peer reviewed literature grows an effective summary of contemporary geomorphic knowledge becomes increasingly difficult The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic Information on the historical development of diverse topics within geomorphology provides context for ongoing research discussion of research strategies equipment and field methods laboratory experiments and numerical simulations reflect the multiple approaches to understanding Earth's surfaces and summaries of outstanding research questions highlight future challenges and suggest productive new avenues for research Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of Earth's diverse surfaces This Treatise on Geomorphology provides a useful synthesis of the state of the discipline as well as highlighting productive research directions that Educators and students researchers will find useful Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field Undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of understanding Editor in Chief Prof J F Shroder of the University of Nebraska at Omaha is past president of the QG G section of the Geological Society of America and present Trustee of the GSA Foundation while being well respected in the geomorphology research community and having won numerous awards in the field A host of noted international geomorphologists have contributed state of the art chapters to the work Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for

consistency and accuracy by the World expert Volume Editors and by the Editor in Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14 volume masterpiece From the foundations and history of geomorphology through to geomorphological innovations and computer modelling and the past and future states of landform science no stone has been left unturned **The Scientific Ideas of G.K. Gilbert** Ellis Leon Yochelson,1980-01-01 **Experiential Learning in Geography** Jonathan E. Wessell,2021-11-01 This book provides insight into the importance and impacts that experiential learning has in geographic education by examining the experience the methods of evaluation and the encounters that students have shared about their experiences It allows the reader to gain insight into what it really takes to prepare and lead students in such experiences both domestically and internationally The book can be used as a guide to planning but also demonstrates the use of experiential learning theory throughout these experiences and especially the importance of reflection by the students on what they are experiencing The book is beneficial to students and faculty alike that are studying geography education *Learning, Environment and Sustainable Development* William Scott,Paul Vare,2020-11-11 This book is an introduction to the long history of human learning the environment and sustainable development about our struggles with the natural world first for survival then for dominance currently for self preservation and in future perhaps even for long term mutually beneficial co existence It charts the long arc of human environment relationships through the specific lens of human learning putting on record many of the people ideas and events that have contributed often unwittingly to the global movement for sustainable development Human learning has always had a focus on the environment It s something we ve been engaged in ever since we began interacting with our surroundings and thinking about the impacts outcomes and consequences of our actions and interactions This unique story told by the authors is episodic rather than a connected linear account it probes questions and re examines familiar issues from novel perspectives and looks ahead The book is of particular interest to those studying and teaching courses with a focus on socio economic and environmental sustainability and non governmental organisations whose work brings them face to face with the general public and social enterprises **Groundwater Geomorphology** Charles G. Higgins,Donald Robert Coates,1990 **Notes techniques en hydrologie** Unesco,1974 **Periglacial Landforms and Processes in the Southern Kenai Mountains, Alaska** Palmer K. Bailey,1985 The distribution and characteristics of periglacial landforms in the southern Kenai Mountains Alaska were investigated during the summer of 1979 The principal area of study was a 1300 metre high mountain mass which stood as a nunatak during the last general glaciation Periglacial features in the area include gelifluction lobes nivation hollows cryoplanation terraces tors a string bog and various forms of patterned ground such as sorted circles sorted polygons earth hummocks sorted steps sorted stripes and small ice wedge polygons Ground temperature measurements indicate that permafrost recently existed in the area but is no longer present The sorted polygons cryoplanation terraces and nivation hollows are relic features which have been inactive for a

considerable time The turf banked sorted steps and large gelifluction lobes were active until the very recent thawing of permafrost Cryofraction and frost sorting still are vigorous active processes Finely jointed bedrock a previous colder environment and long exposure in the absence of glacial ice has allowed periglacial processes to be the dominant surface agents both in the principal study area and in similar areas along the western side of the Kenai Mountains Author
