Overcoming Students' Misconceptions in Science Mageswary Karpudewan,Ahmad Nurulazam Md Zain,A.L.
Chandrasegaran,2017-02-28 This book discusses the importance of identifying and addressing misconceptions for the
successful teaching and learning of science across all levels of science education from elementary school to high school It
suggests teaching approaches based on research data to address students common misconceptions Detailed descriptions of
how these instructional approaches can be incorporated into teaching and learning science are also included The science
education literature extensively documents the findings of studies about students misconceptions or alternative conceptions
about various science concepts Furthermore some of the studies involve systematic approaches to not only creating but also
implementing instructional programs to reduce the incidence of these misconceptions among high school science students
These studies however are largely unavailable to classroom practitioners partly because they are usually found in various
science education journals that teachers have no time to refer to or are not readily available to them In response this book
