Globalization, International Education Policy and Local Policy Formation Carolyn A. Brown, 2014-10-13 This edited volume focuses on how international education policy set by international policymakers and donors influences local education policy in developing countries The book's primary purpose is to give voice to scholars from developing countries and regions around the world by inviting them to explore how the international policy invariably linked to international aid influences education policy formation and implementation in their country or region and how this influence does or does not meet the local cultural social economic and political needs A relatively recent and small body of research and commentary supports a discourse that questions how well international education policy mandates such as Education For All serve the needs of developing countries The intent of this book is to advance this discourse by giving voice to local scholars who observe and study the donor process The book will be divided into two sections the first section will set the stage for the discussions in the second section by providing theoretical and historical context for international education policy As a framework for understanding the book adopts the position that international policy does not have either the ability or the intent to serve the widely diverse needs of development around the world International education policy has been formed historically by wealthy nations and agencies dominated by Western theoretical paradigms In recent years donor countries have made an effort to collaborate with developing countries in developing international education policy goals however this collaboration has been limited Following establishment of the context of international education policy section II of the book provides a forum for scholars from around the world to openly discuss and critique the impact of international policy on education in their country or region

**Preparing for Life in a Digital World** Julian Fraillon, John Ainley, Wolfram Schulz, Tim Friedman, Daniel Duckworth, 2020-02-13 This Open Access book summarizes the key findings from the second cycle of IEA's International Computer and Information Literacy Study ICILS conducted in 2018 ICILS seeks to establish how well schools around the globe are responding to the need to provide young people with the necessary digital participatory competencies Effective use of information and communication technologies ICT is an imperative for successful participation in an increasingly digital world ICILS 2018 explores international differences in students computer and information literacy CIL namely their ability to use computers to investigate create and communicate at home at school in the workplace and in the community Participating countries also had an option to administer an assessment of students computational thinking CT focused on their ability to recognize aspects of real world problems appropriate for computational formulation and to evaluate and develop algorithmic solutions to those problems so that the solutions could be operationalized with a computer The data collected by ICILS 2018 show how digital competencies can be assessed using instruments representing authentic contexts for ICT use and how students CIL and CT skills relate to school learning experiences out of school contexts and student characteristics Those data also show

how learning technologies are used in classrooms around the world Background questionnaires asked students about their use of ICT and collected information from teachers schools and national education systems about the resourcing and teaching of CIL and CT within their countries The results of ICILS 2018 will enable policymakers and education systems to develop a better understanding of the contexts and outcomes of CIL and CT education programs Developing Science, Mathematics, and ICT Education in Sub-Saharan Africa Wout Ottevanger, J. J. H. van den Akker, Leo de Feiter, 2007-01-01

Developing Science Mathematics and ICT SMICT in Secondary Education is based on country studies from ten Sub Saharan African countries Botswana Burkina Faso Ghana Namibia Nigeria Senegal South Africa Uganda Tanzania and Zimbabwe and a literature review It reveals a number of huge challenges in SMICT education in sub Saharan Africa poorly resourced schools large classes a curriculum hardly relevant to the daily lives of students a lack of qualified teachers and inadequate teacher education programs Through examining country case studies this paper discusses the lessons for improvement of SMICT in secondary education in Africa *Using ICT in Inquiry-Based Science Education* Geraldo W. Rocha Fernandes, António M. Rodrigues, Carlos Alberto Rosa Ferreira, 2019-05-21 This book analyzes the main Information and Communication Technologies ICT used in science education and the main theoretical approaches that support science education mediated by ICT in order to show how digital technologies can be employed in Inquiry Based Science Education It presents the results of a comprehensive review of studies focusing both on the use and effects of digital technologies in science education and on the different theoretical approaches that support the use of ICTs in science teaching By doing so the book provides a useful summary of the current research in the field and a strong analysis of its limitations It concludes that there are few studies that report strategies and didactics for the practical use of ICT in science classes and that the use of ICT in science education can't be seen as an isolated action without a theoretical basis to support it Based on these conclusions the volume identifies the main ICTs used in inquiry activities the main steps in inquiry activities used in science education and their approaches to the use of ICT It shows that the use of ICT in Inquiry Based Science Education allows students to develop more active work styles improved attitudes towards science better conceptual and theoretical understanding improved reasoning better modelling capabilities and improved teamwork along with improvements in other abilities Using ICT in Inquiry Based Science Education will be a valuable resource for science teachers and science teacher educators looking for an introductory text that presents an overview of the scientific research analyzing the implementation of digital technologies in science teaching and that provides useful insights to all educators interested in using digital technologies to introduce their students in the world of scientific inquiry and research *Textbook Policies in Asia* Andy Smart, Shanti Jagannathan, 2018-12-01 This comparative study provides an overview of the textbook production chain starting with its origins in the curriculum and suggests ways in which policymakers can make improvements at every point in the chain With evidence from a range of countries mainly in Asia the study is intended as a resource for policymakers and as a

reference and benchmark for education systems Although the study focuses on textbooks which are the priority for governments and teachers and represent the greatest item of expenditure on teaching and learning materials it also includes other teaching and learning materials including digital resources
