the relation between mathematics and science positively it effects students scientific self concept negatively Thus integrated learning should not substitute but rather complement disciplinary learning Obwohl zahlreiche Argumente für das integrierte Lernen von Mathematik und Naturwissenschaften existieren ist die vorteilhafte Wirkung integrierten Lernens begrenzt empirisch belegt Im Rahmen dieser quasi experimentellen Studie wird der Effekt integrierten Lernens auf acht Sch lervariablen durch Vergleiche mit einer Kontrollgruppe untersucht Die Ergebnisse zeigen dass integriertes Lernen kein Allheilmittel ist sondern positive und negative Effekte auf bestimmte Sch lervariablen hat Während integriertes Lernen die Sicht der Sch lerinnen und Sch ler auf die Beziehung zwischen Mathematik und Naturwissenschaften positiv beeinflusst hat es einen negativen Effekt auf das naturwissenschaftliche Selbstkonzept Daher sollte integriertes Lernen nicht stellvertretend sondern ergänzend zu disziplinärem Lernen implementiert werden

Concepts and Practices of STEM Education in Asia May May Hung Cheng, Cathy Bunting, Alister Jones, 2022-10-20 The purpose of this edited book is to enrich the literature related to STEM education at kindergarten primary and secondary levels in Asia with particular attention given to the analysis of the educational context in a number of Asian countries including STEM related policies pedagogical practices and the design and evaluation of STEM programmes The discussions look into impacts on student learning outcomes and the ways in which STEM education is catering for schools and students interests and needs The contributors are experts in STEM education or are leading major research and development projects in STEM in their regions The book's first section is focused at the macro level on the conceptualization and formulation of STEM education policies in different regions contributing to our understanding of the current status of STEM education in Asia The second section examines some features of STEM learning and teaching at the classroom level and includes studies on student learning in STEM programmes Pedagogical innovations implemented in different parts of Asia are also reported and discussed The third section moves to teacher education and teacher professional development It discusses practices of teacher professional development in the region and reports on current provisions as well as challenges Together the contributions from different Asian regions invite researchers and educators to learn from effective STEM practices and point out areas for further development Chapters An Overview of STEM Education in Asia and STEM Teacher Professional Development for Primary School Teachers in Hong Kong are available open access under a CC BY 4.0 license at [link.springer.com](https://link.springer.com)

Hetherington,2014-04-30 Vic and Sade an often absurd situation comedy written by the prolific Paul Rhymer aired on America's radios from 1932 to 1944 with short lived revivals afterward The title characters known as radio's home folks were a married couple exploring the comedic side of ordinary life along with their adopted son and an eccentric uncle This book examines the program's depiction of many aspects of American culture leisure activities community groups education films in light of the critiques put forward by the era's critics such as William Orton Vic and Sade offered its own subtle cultural critique that reflected how ordinary people experienced mass culture of the time Civil Engineering and Urban Planning IV Yuan-Ming Liu,Dong Fu,Zhen-Xin Tong,Zhi-Qing Bao,Bin Tang,2016-10-28 Civil Engineering and Urban Planning IV includes the papers presented at the 4th International Conference on Civil Engineering and Urban Planning CEUP 2015 Beijing China 25-27 July 2015 The contributions from experts and world renowned scientists cover a wide variety of topics Civil engineering Architecture and urban planning Transport Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek,Joachim Funke,Magda Osman,Annette Kluge,2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e.g. minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement

each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained
