Frank,2012-09-16 What Charles Darwin can teach us about building a fairer society Who was the greater economist Adam Smith or Charles Darwin The question seems absurd Darwin after all was a naturalist not an economist But Robert Frank New York Times economics columnist and best selling author of *The Economic Naturalist* predicts that within the next century Darwin will unseat Smith as the intellectual founder of economics The reason Frank argues is that Darwin s understanding of competition describes economic reality far more accurately than Smith s And the consequences of this fact are profound Indeed the failure to recognize that we live in Darwin s world rather than Smith s is putting us all at risk by preventing us from seeing that competition alone will not solve our problems Smith s theory of the invisible hand which says that competition channels self interest for the common good is probably the most widely cited argument today in favor of unbridled competition and against regulation taxation and even government itself But what if Smith s idea was almost an exception to the general rule of competition That s what Frank argues resting his case on Darwin s insight that individual and group interests often diverge sharply Far from creating a perfect world economic competition often leads to arms races encouraging behaviors that not only cause enormous harm to the group but also provide no lasting advantages for individuals since any gains tend to be relative and mutually offsetting The good news is that we have the ability to tame the Darwin economy The best solution is not to prohibit harmful behaviors but to tax them By doing so we could make the economic pie larger eliminate government debt and provide better public services all without requiring painful sacrifices from anyone That s a bold claim Frank concedes but it follows directly from logic and evidence that most people already accept In a new afterword Frank further explores how the themes of inequality and competition are driving today s public debate on how

much government we need      *The International Economic Crisis and the Post-Soviet States* Valentina Feklyunina, Stephen White, 2014-06-11 At first it seemed as if the international financial crisis that broke out in 2008 would have little effect in Russia and the other post Soviet states But by the end of the year growth was slowing banks were reluctant to lend share values had collapsed and unemployment was rising inexorably The stability of the Putin leadership it appeared had been built on the turnaround in economic performance that it had managed to achieve over more than a decade How would it cope with a sudden reversal In Ukraine living standards fell even more sharply In Belarus there were fewer obvious signs of economic difficulty but it could hardly be unaffected by the performance of its major trading partners Drawing on a wide range of evidence an international group of scholars address the impact of the international financial crisis in the post Soviet states and the continuing implications of the crisis for these countries themselves and for the wider world This book was published as a special issue of the Journal of Communist Studies and Transition Politics now known as East European Politics
