Airasian presents complex concepts clearly so that pre-service teachers can understand them and solidly grounds these concepts in best practice through practical, real, well-integrated examples. He talks to not-at-users. The text conceives of classroom assessment in a broader way than many other texts. It focuses not only on the assessment needs of testing, grading, interpreting standardized tests and performance assessments but also on assessment concerns in organizing a classroom at the start of school planning and implementing instruction and strategies of teacher self-reflection. It views classroom assessment as an everyday, ongoing, integral part of teaching, not something that is separated from life in classrooms. The text is organized in a manner that follows the natural progression of teacher decision-making from organizing the class as a learning community to planning and conducting instruction to the formal evaluation of learning and finally to grading.
