Learning Science Through Drama Debra McGregor, Dayle Anderson, 2023-01-01 This book presents a wide range of international perspectives that explore the different ways the diverse forms of drama supports learning in science. It illustrates how learning science by adopting and adapting theatrical techniques can offer more inclusive ways for students to relate to scientific ideas and concepts. The theatrical processes by which subject matter can be introduced, thought about, discussed, transformed, enacted and disseminated are shown to be endless. The first section of the book considers different ways of theorising and applying drama in classrooms. The second section provides a range of case studies illustrating how role play, performance, embodiment and enquiry approaches can be utilised for learning in primary, secondary and tertiary education contexts. The third section demonstrates how different research methods from questionnaires, particular kinds of tests and even the theatrical conventions themselves can provide rich data that informs how drama impacts on learning science.

Advances in the Potential Treatments of Gastrointestinal and Liver Diseases: Addressing the Public Health Burden Mariana Jinga,Adina Turcu-Stiolica,Maria Dimitrova,2023-08-07 *How Schools*

Really Matter Douglas B. Downey,2020-12-07 Most of us assume that public schools in America are unequal that the quality of the education varies with the location of the school and that as a result children learn more in the schools that serve mostly rich white kids than in the schools serving mostly poor black kids But it turns out that this common assumption is misplaced As Douglas B Downey shows in *How Schools Really Matter* achievement gaps have very little to do with what goes on in our schools Not only do schools not exacerbate inequality in skills they actually help to level the playing field The real sources of achievement gaps are elsewhere A close look at the testing data in seasonal patterns bears this out It turns out that achievement gaps in reading skills between high and low income children are nearly entirely formed prior to kindergarten and schools do more to reduce them than increase them And when gaps do increase they tend to do so during summers not during school periods So why do both liberal and conservative politicians strongly advocate for school reform arguing that the poor quality of schools serving disadvantaged children is an important contributor to inequality It s because discussing the broader social and economic reforms necessary for really reducing inequality has become too challenging and polarizing it s just easier to talk about fixing schools Of course there are differences that schools can make and Downey outlines the kinds of reforms that make sense given what we know about inequality outside of schools including more school exposure increased standardization and better and fairer school and teacher measurements *How Schools Really Matter* offers a firm rebuke to those who find nothing but fault in our schools which are doing a much better than job than we give them credit for It should also be a call to arms for educators and policymakers the bottom line is that if we are serious about reducing inequality we are going to have to fight some battles that are bigger than school reform battles against the social inequality that is reflected within rather than generated by our public school system
