Hidden History Of The Laurel Highlands:

Hidden History of the Laurel Highlands Cassandra Vivian, 2014-11-04 History lies almost forgotten among the low mountains and quaint towns of Pennsylvania's Laurel Highlands. Tales of Titanic survivors, brilliant inventors, and forgotten heroes are all a part of the region's dim past. Since the 1790s, the highlands have been home to a booming glass industry that spun out early windows and flasks and later beautifully cut pieces of art. The wonder of the World's Fair of 1893 was none other than Westmoreland's H. C. Frick Coke Co.'s replica of a modern mine. In the eighteenth and nineteenth centuries, lush fields and meadows produced the country's finest whiskey, Monongahela Rye. Author Cassandra Vivian travels off the beaten path to explore the hidden history of the Laurel Highlands.

Henry Clay Frick and the Golden Age of Coal and Coke, 1870-1920 Cassandra Vivian, 2020-04-09 Once the beehive coke oven was perfected in Fayette County, Pennsylvania, the coal and coke industry began to flourish and supply other fledgling industries with the fuel they needed to succeed. The thrust of this growth came from Henry Clay Frick, who opened his first coal mines in the Morgan Valley of Fayette County in 1871. There, he helped lead the industry, making it the major developmental force in industrial America. This book traces the birth and growth of the early coal and coke industry from 1870 to 1920, primarily in Fayette and Westmoreland Counties. Beyond Frick's importance to the industry, other major topics covered in this history include the lives and struggles of the miners and immigrants who worked in the industry, the growth of unions, and the many strikes in the region, and the attempts to clean the surrounding waterways from the horrific pollution that resulted from industrial development. Perhaps the most significant fact is that this book uses primary sources contemporary with the golden age of the coal and coke industry. That effort offers an alternative view and helps repair the common portrayal of Frick as corrupt by showing his work as that of an industrial genius.

From the Steel City to the White City Zachary L. Brodt, 2023-11-21 In *From the Steel City to the White City*, Zachary Brodt explores Western Pennsylvania's representation at Chicago's Columbian Exposition, the first major step in demonstrating that Pittsburgh was more than simply America's crucible; it was also a region of developing culture and innovation. The 1893 Columbian Exposition presented a chance for the United States to prove to the world that it was an industrial giant ready to become a global superpower. At the same time, Pittsburgh, a commercial center that formerly served as a starting point for western expansion, found itself serving as a major transportation and increasingly industrial hub during this period of extensive growth. Natural resources like petroleum and coal allowed Western Pennsylvania to become one of the largest iron and steel producing regions in the world. The Chicago fairgrounds provided a lucrative opportunity for area companies not only to provide construction materials but to display the region's many products. While Pittsburgh's most famous contributions to the 1893 World's Fair, alternating current electricity and the Ferris wheel, had a lasting impact on the United States and the world, other exhibits provided a snapshot of the area's industries, natural resources, and inventions. The success of these exhibits, Brodt reveals, launched local companies into the twentieth century, ensuring a steady flow of work.
