

### 3. Marking points

#### 3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which students have provided extra responses. The general principle to be followed in such a situation is that 'right + wrong = wrong'.

Each error / contradiction negates each correct response. So, if the number of error / contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as \* in example 1) are not penalised.

Example 1: What is the pH of an acidic solution?

[1 mark]

| Student | Response | Marks awarded |
|---------|----------|---------------|
| 1       | green, 5 | 0             |
| 2       | red*, 5  | 1             |
| 3       | red*, 8  | 0             |

Example 2: Name two planets in the solar system.

[2 marks]

| Student | Response                                                      | Marks awarded |
|---------|---------------------------------------------------------------|---------------|
| 1       | Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune | 0             |

#### 3.2 Marking of short-answer questions (multiple)

For questions asking for short-answer responses, students are given a set number of responses to provide. If a student provides more than the given number of responses, the question is marked as wrong. If the number of responses given is less than the required number, the question is marked as wrong.

#### 3.3 Marking of short-answer questions (single)

For questions asking for short-answer responses, students are given a set number of responses to provide. If a student provides more than the given number of responses, the question is marked as wrong. If the number of responses given is less than the required number, the question is marked as wrong.

#### 3.4 Marking of short-answer questions

For questions asking for short-answer responses, students are given a set number of responses to provide. If a student provides more than the given number of responses, the question is marked as wrong. If the number of responses given is less than the required number, the question is marked as wrong.
