Nikon D3100 Simon Stafford,2011 A guide to the Nikon D3100 camera describes the camera s controls exposure and focusing systems custom settings shooting and setup menus and discusses the lenses and accessories available *Dslr in Manual Mode* Joshua Rexrode,2017-08-25 If you have an interest in photography you may be wondering how you can improve and take better photographs Learning how to use manual mode on your camera is one of the best ways to start taking better photos This book will help you do just that In this book we will cover everything you need to know to take the leap out of auto mode and start using your camera to its full potential We will cover the topics of ISO shutter speed and aperture As well as how to use your cameras metering system to make sure your shot is perfectly exposed This book will also cover how to use them all together to get the shot that you want Each subject will be broken down in detail and examples will be given to help guide you into using manual mode like a pro As an avid photographer myself learning how to shoot in manual was a major turning point in the quality of my photographs There is nothing at all wrong with shooting in automatic mode but for anyone wanting to take their photography to the next level manual mode is where it s at I hope you find this book helpful and get everything you need out of it to bring your photos to life I hope you enjoy and keep on taking photographs **Dslr Manual Photography Explained!** Aaron Chase,2014-03-04 Why would I want to use the manual mode if my camera can automatically adjust these settings for me Well for the same reason that professional photographers use manual mode Control You see when you let your camera automatically choose it s exposure settings based on the information it s sensors are giving it your camera will strive to expose the image as close to what the human eye would perceive the scene However the problem with this is not only that it sometimes gets it wrong but also that the way the eye might see a scene is many if not most times not the most beautiful interesting way to capture that scene For example if you were taking a picture of the sun at sunset your camera might automatically want to expose the image rather darkly attempting to make both sun and landscape are properly exposed Your camera does not realize that a much more interesting picture could be created if you exposed the image so that the landscape became the star of your photograph exposing it so that it being the breathtaking landscape is well lit rich and interesting Or you could use your camera s automatic setting and end up with the landscape being a too dark uninteresting blob of dirt Another reason to use your DSLR s manual setting is that of style No matter

whether photography is your hobby or you are looking to become a serious photographer you will eventually develop a style that you want your photography to look like Maybe that style is a dark and moody style or maybe it is a bright and cheerful style Regardless with manual you can control how your images feel and create a distinct and beautiful style in your images Whereas if you use the automatic setting this ability is taken away from you and you will end up looking like the hundreds of thousands of other digital camera users out there
