Realizing the Distinctive University Mark William Roche, 2017-02-28 In Realizing the Distinctive University Vision and Values Strategy and Culture Mark William Roche changes the terms of the debate about American higher education A former dean of the College of Arts and Letters at the University of Notre Dame Roche argues for the importance of an institutional vision not simply a brand and while he extols the value of entrepreneurship he defines it

in contrast to the corporate drive toward commercialization and demands for business management models Using the history of the German university to assess the need for and implementation of distinctive visions at American colleges and universities Roche's own vision benefits from his deep connection to both systems as well as his experience in the trenches working to realize the special mission of an American Catholic university Roche makes a significant contribution by delineating means for moving such an institution from vision to implementation Roche provides a road map to creating a superb arts and sciences college within a major research university and offers a rich analysis of five principles that have shaped the modern American university flexibility competition incentives accountability and community He notes the challenges and problems that surface with these categories and includes ample illustration of both best practices and personal missteps The book makes clear that even a compelling intellectual vision must always be linked to its embodiment in rhetoric support structures and community Throughout this unique and appealing contribution to the literature on higher education Roche avoids polemic and remains optimistic about the ways in which a faculty member serving in administration can make a positive difference Realizing the Distinctive University is a must read for academic administrators faculty members interested in the inner workings of the university and graduate students and scholars of higher education

Congress, 1999 **Resources in Education**, 1997-07 **The Human Rights Covenants at 50** Daniel Moeckli, Helen Keller, Corina Heri, 2018-06-07 Half a century ago on 16 December 1966 the UN General Assembly adopted the International Covenant on Civil and Political Rights ICCPR and the International Covenant on Economic Social and Cultural Rights ICESCR While the adoption of the two UN human rights covenants was celebrated all over the world their 50th anniversary has received very little attention from the international community The present book marks this anniversary by taking stock of the first half century of the existence of what are probably the world's two most important human rights treaties It does so by reflecting on what the covenants have achieved or failed to achieve in the years that have passed by determining and comparing their current influence in the various regions of the world and by assessing their potential roles in the future The book contains papers that were presented during a symposium held in Zurich in 2016 which brought together experts and stakeholders from a range of disciplines and world regions Some fundamental issues that are addressed by the contributors are as old as the two covenants themselves They concern for example the division of human rights into first and second generation rights and the question of whether there should be one central monitoring body possibly a world court or more than just one However the contributors go beyond such questions that have been explored before they develop new answers to old questions and point to new challenges
