How Literature Changes the Way We Think Michael Mack,2011-12-01 **Out of Our Minds** Felipe Fernández-Armesto,2020-10-06 A stimulating history of how the imagination interacted with its sibling psychological faculties emotion perception and reason to shape the history of human mental life The Wall Street Journal To imagine to see what is not there is the startling ability that has fueled human development and innovation through the centuries As a species we stand alone in our remarkable capacity to refashion the world after the picture in our minds Traversing the realms of science politics religion culture philosophy and history Felipe Fern ndez Armesto reveals the thrilling and disquieting tales of our imaginative leaps from the first Homo sapiens to the present day Through groundbreaking insights in cognitive science Fern ndez Armesto explores how and why we have ideas in the first place providing a tantalizing glimpse into who we are and what we might yet accomplish Unearthing historical evidence he begins by reconstructing the thoughts of our Paleolithic ancestors to reveal the subtlety and profundity of the thinking of early humans A masterful paeon to the human imagination from a wonderfully elegant thinker Out of Our Minds shows that bad ideas are often more influential than good ones that the oldest recoverable thoughts include some of the best that ideas of Western origin often issued from exchanges with the wider world and that the pace of innovative thinking is under threat How We Think John Dewey,2021-04-05 How We Think is a book written by the American educational philosopher John Dewey published in 1910 How We Think John Dewey,2020-02-26 How We Think John Dewey No words are oftener on our lips than thinking and thought So profuse and varied indeed is our use of these words that it is not easy to define just what we mean by them The aim of this chapter is to find a single consistent meaning Assistance may be had by considering some typical ways in which the terms are employed In the first place thought is used broadly not to say loosely Everything that comes to mind that goes through our heads is called a thought To think of a thing is just to be conscious of it in any way whatsoever Second the term is restricted by excluding whatever is directly presented we think or think of only such things as we do not directly see hear smell or taste Then third the meaning is further limited to beliefs that rest upon some kind of evidence or testimony Of this third type two kinds or rather two degrees must be discriminated In some cases a belief is accepted with slight or almost no attempt to state the grounds that support it In other cases the ground or basis for a belief is deliberately sought and its adequacy to support the belief examined This process is called reflective thought it alone is truly educative in value and it forms accordingly the principal subject of this volume We

shall now briefly describe each of the four senses I In its loosest sense thinking signifies everything that as we say is in our heads or that goes through our minds He who offers a penny for your thoughts does not expect to drive any great bargain In calling the objects of his demand thoughts he does not intend to ascribe to them dignity consecutiveness or truth Any idle fancy trivial recollection or flitting impression will satisfy his demand Daydreaming building of castles in the air that loose flux of casual and disconnected material that floats through our minds in relaxed moments are in this random sense thinking More of our waking life than we should care to admit even to ourselves is likely to be whiled away in this inconsequential trifling with idle fancy and unsubstantial hope In this sense silly folk and dullards think The story is told of a man in slight repute for intelligence who desiring to be chosen selectman in his New England town addressed a knot of neighbors in this wise I hear you don't believe I know enough to hold office I wish you to understand that I am thinking about something or other most of the time Now reflective thought is like this random coursing of things through the mind in that it consists of a succession of things thought of but it is unlike in that the mere chance occurrence of any chance something or other in an irregular sequence does not suffice Reflection involves not simply a sequence of ideas but a consequence a consecutive ordering in such a way that each determines the next as its proper outcome while each in turn leans back on its predecessors The successive portions of the reflective thought grow out of one another and support one another they do not come and go in a medley

"How we think" and selected essays John Dewey, 1985 William James remarking in 1909 on the differences among the three leading spokesmen for pragmatism himself F C S Schiller and John Dewey said that Schiller's views were essentially psychological his own epistemological whereas Dewey's panorama is the widest of the three The two main subjects of Dewey's essays at this time are also two of the most fundamental and persistent philosophical questions the nature of knowledge and the meaning of truth Dewey's distinctive analysis is concentrated chiefly in seven essays in a long significant and previously almost unknown work entitled *The Problem of Truth* and in his book *How We Think* As a whole the 1910-11 writings illustrate especially well that which the Thayers identify in their Introduction as Dewey's deepening concentration on questions of logic and epistemology as contrasted with the more pronounced psychological and pedagogical treatment in earlier writings

How We Think (Classic Reprint) John Dewey, 2017-09-17 Excerpt from *How We Think* Our schools are troubled with a multiplication of studies each in turn having its own multiplication of materials and principles Our teachers find their tasks made heavier in that they have come to deal with pupils individually and not merely in mass Unless these steps in advance are to end in distraction some clew of unity some principle that makes for simplification must be found This book represents the conviction that the needed steadying and centralizing factor is found in adopting as the end of endeavor that attitude of mind that habit of thought which we call scientific This scientific attitude of mind might conceivably be quite irrelevant to teaching children and youth But this book also represents the conviction that such is not the case that the native and unspoiled attitude of childhood marked by ardent curiosity fertile imagination and love of
