

# HUMAN URINARY TRACT AND KIDNEY

Name \_\_\_\_\_

Label the parts of the human urinary system, including the human kidney, in the diagram below. Give the function/purpose of each part.

- kidneys removes nitrogen, salts, & water from blood
- adrenal glands produce epinephrine & norepinephrine
- ureter drains kidney into the bladder
- urinary bladder stores urine until it can be released
- urethra drains urinary bladder to
- renal artery artery leading to kidneys - brings "dirty" blood
- renal vein vein leading away from kidney - removes "clean" blood
- cortex outer layer of kidney
- medulla inner layer of kidney - contains many nephrons
- renal pelvis drains each nephron - central area, collects urine

Fill in the blanks below with the correct answers.

Kidneys are the "filters" of the excretory system. They control essential balance between body salts and water. They remove from the blood nitrogenous wastes, water, urea, nonvolatile foreign substances, excess salt and excess water. The kidney is enclosed by a connective tissue capsule and is divided into an outer cortex and an inner medulla. The Loop of Henle functions chiefly for water resorption. The liquid waste, urine, collected by the kidneys passes through the ureter to the urinary bladder. Urinary bladder is a strong muscular organ that stores the urine until it can be excreted via the urethra.

*Treasury of Human Inheritance, Vol. 1 (Classic Reprint)* Karl Pearson, 2017-10-22 Excerpt from Treasury of Human Inheritance Vol 1 For a publication of this kind to be successful at the present time it should as I have indicated above be entirely free from controversial matter The Treasury of Human Inheritance therefore contains no reference to theoretical opinions It gives in a standardised form the pedigree of each stock This is accompanied by a few pages of text describing the individual members of the stock giving references to authorities and if the material has been published to the locus of original publication When necessary the characteristic is illustrated by photography or radiography In this way it is hoped in the course of a few years to place a large mass of material in the hands of the student of human heredity It will not cut him off from but directly guide him to original and fuller sources of information Further the Treasury will provide students of eugenics and of sociology medical men and others with an organ where their investigations can find ready publication and where as time goes on a higher and more complete standard of family history than has hitherto been usual can be maintained Each pedigree and its description appears under the name of the author responsible for its completeness and accuracy and by aid of a key number to a confidential manuscript register of names and localities it is hoped that it may be occasionally possible for future investigators to recover traces of individual stocks or to ascertain whether newly discovered cases can be linked on to previously recorded families No one who has attempted a collection of this kind drawn from many quarters and prepared by different writers will be over severe on discrepancies and omissions in the earlier issues The full work of standardisation can only be carried out as the diverse needs of different types of family characters are better appreciated It is not always possible to maintain a proper balance between the graphic and verbal descriptions but I wish most strongly to insist on the point that neither are to be interpreted alone they are component parts of one whole and the reader who draws conclusions from the engraved pedigrees without consulting the verbal accounts is certain to be led into error Presence or absence of a character cannot be settled by the simple blacking or omitting to black a circle The description is practically that of the original observer whereas the pedigree is the work of the author of the special section of the Treasury and he may under or over estimate the statement presented to him As general editor I feel sure that much care has been taken to reach an unbiassed judgment and I know that contributors and members of this laboratory have Spent many days of labour in
