Gamification and Industry 4.0 Lars Konzack, 2024-11-05 Gamification and Industry 4 0 are two concepts that each in their own right have sparked attention Gamification as a way to use game elements in non game activities and Industry 4 0 as a way to describe how the interconnected digital transformation of operational technologies are changing manufacturing in the 21st Century Gamification now offers an opportunity to enhance the productivity of manufacturing and improve quality of work life in the process Gamification and Industry 4 0 looks at how the transformative shift of production and manufacturing opens up for gamified experiences in the work place What the industry requires are deeper kinds of gamification comprehending the knowledge of industrial production computer applications game design learning and motivational psychology In order to achieve this this book offers interdisciplinary expertise from such fields as psychology management software engineering information science game studies and industrial production and innovation The concept of Industry 4 0 and different types of gamifications are discussed in relation to motivation and learning The book also examines cybersecurity of gamified systems and the potential risks any changes made to digital devices and industrial control systems may cause This unique book will be of value to researchers academics and upper level students across various fields but in particular management and organization studies production and manufacturing as well as technology and innovation management

Control of Ground

and Aerial Robots Mario Sarcinelli-Filho, Ricardo Carelli, 2023-01-19 The focus of this book is kinematic and dynamic control of a single mobile robot or a group of them New simple and integrated solutions are presented for tasks of positioning trajectory tracking and path following Control of Ground and Aerial Robots synthesizes new results on control of mobile robots developed by M Sc and Ph D students supervised by the authors The robots considered are wheeled mobile platforms with emphasis on differential drive vehicles and the multirotor aerial robots Integrated control solutions based on the technique of feedback linearization are proposed to guide either a single robot or a homogeneous heterogeneous group of mobile robots Examples on the use of the proposed controllers are also provided Finally Control of Ground and Aerial Robots is intended to help graduate and advanced undergraduate students in engineering as well as researchers in the area of robot control to design controllers to autonomously guide the more common mobile platforms **Instruments & Control**

Systems ,1963-07 The New Walford Guide to Reference Resources Ray Lester, 2005 The New Walford highlights the best resources to use when undertaking a search for accurate and relevant information saving you precious time and effort For those looking for a selective and evaluative reference resource that really delivers on its promise look no further In addition to print sources The New Walford naturally covers an extensive range of e reference sources such as digital databanks digital reference services electronic journal collections meta search engines networked information services open archives resource discovery services and websites of premier organizations in both the public and private sectors But rather than supplying a list of all available known resources as a web search engine might The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful With an emphasis on quality and sustainability the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas As a result the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature This ensures that The New Walford is clear easy to use and intuitive Publisher Progress in Renewable Energies Offshore C.
