### **Introduction**

An African proverb says, "A village is needed to raise a child." This statement provides an affirmation of a common belief that a lot of people thrive and survive in different communal environments (societies, villages, and families). It is in these circles in which they relate to the feeling of mental, social, spiritual, and emotional support. Therefore, it becomes quite natural to think that among our most important responsibilities as human beings should be to take care and offer support to others. As we provide this support, it is also important that we keep the best interest of other people in mind. In other words, we should also extend our grace whenever possible as we introduce biases as little as possible.

### **Why Study Anthropology**

The field of anthropology is essential to our society in general. From the very first time man walked on earth, there were a lot of challenges to their survival. He has developed different habits which allowed him to endure a lot of challenges and hardships. He has created places for shelters, protecting him from different elements. He also discovered the plants that were good for eating, and the ones that are deemed dangerous. He has also developed different ways on how to take advantage of the rich resources naturally offered by our planet. He has also created rituals and traditions to celebrate victories, good fortune and relationships. All of these experiences and knowledge were passed from one generation to another, guaranteeing survival, while reducing the burden of the succeeding generations. Anthropology refers to the science of studying all these things.
