context in which the Conventions are to be applied and interpreted has changed considerably since they were first written. The borderline between international and non international armed conflicts is not as clear cut as was once thought and is complicated further by the use of armed force mandated by the United Nations and the complex mixed and transnational nature of certain non international armed conflicts. The influence of other developing branches of international law such as human rights law and refugee law has been considerable. The development of international criminal law has breathed new life into multiple provisions of the Geneva Conventions. This commentary adopts a thematic approach to provide detailed analysis of each key issue dealt with by the Conventions taking into account both judicial decisions and state practice. Cross cutting chapters on issues such as transnational conflicts and the geographical scope of the Conventions also give readers a full understanding of the meaning of the Geneva Conventions in their contemporary context. Prepared under the auspices of the Geneva Academy of International Humanitarian Law and Human Rights this commentary on four of the most important treaties in international law is unmissable for anyone working in or studying situations of armed conflicts.

Poverty

Working Group on Poverty: Access and Participation in the Arts, Jeanne Moore, 1997 The Holy Bible, 1901 Pierre Koenig Neil Jackson, 2019-02-05. A heavily illustrated and highly designed tribute to Los Angeles architect Pierre Koenig, a key figure of the Los Angeles Modernist movement. In this remarkable and gorgeously illustrated book, Neil Jackson presents a vibrant profile of the Los Angeles architect Pierre Koenig, who Time magazine said lived long enough to become cool twice. From the influences of Koenig's youth in San Francisco and his military service during World War II to the Case Study Houses and his later award-laden years, Jackson's study plots the evolution of Koenig's oeuvre against the backdrop of Los Angeles, a city that both shaped and was shaped by his architecture. The book is anchored by Jackson's exciting discoveries in Koenig's archive at the Getty Research Institute: drawings, photographs, diaries, letters, lecture notes, building contracts, and university projects, many of which are published for the first time, provide an expanded understanding of Koenig and additional context for his architectural achievements. An examination of Koenig's Case Study Houses shows how his often single-minded and pragmatic approach to domestic architecture recognized the advantages of production housing and presciently embraced sustainable, ecologically responsible design. A new account of the Chemehuevi housing project in Havasu Lake, California, demonstrates the special role that learning and teaching played in the development of his architecture. Over his fifty-year career, Koenig not only designed iconic houses but also directed their restoration and curated their legacy, ensuring that his work could be seen and appreciated by present and future admirers of midcentury Los Angeles.
