The HP-2 operation is simple.  
**VOLTAGE ADJUSTMENT:** Use the up and down arrow buttons to adjust voltage. The default adjustment resolution is 1(1/10)volt, you can change this value in the config menu. When you adjust these values, they are stored in the power supply memory even in the event of power down.

**PRESETS:** The power supply is shipped in 2 machine modes, in two machine modes there is one voltage preset for the L button and one for the S button. In the config menu, you can change to 4 machine modes. In 4 machine modes there are two presets for each of the L and S buttons. Pressing the L button will access and toggle between the two liner presets and pressing S button will access and toggle between the two shader presets.

**FOOT SWITCH MODES:** Your HP-2 has 2 foot switch mode options. Momentary mode is the conventional operation mode that most artists are using to where power is supplied to the machine only when the pedal is actuated. Maintained mode functions as a typical maintained switch "Push on, Push off". Be careful not to leave maintained mode activated while machine is unattended or bound up. This situation could damage the power supply or even your machine. One example of a bound up machine is when ink dries in your tube and your A-bar cannot break the needles free. To toggle between maintain mode and momentary mode, press and hold the L or S button for 1.5 sec.

6

The HP-2 operation is quite simple. Now your unit is powered up and ready to use in wired, momentary foot switch operation mode. Use the L/S button to select between the liner and shader presets. Use the Up/Down arrow button to adjust voltage. The pre-programmed presets are 5 volts for the liner and 7 volts for the shader. When you adjust these values it is stored in the power supply memory even in the event of power down.

**STOP WATCH** operation is as follows: The clock button performs four functions: start, stop, resume and reset. When the stop watch is not counting, pressing the button starts or resumes the clock count. When counting, pressing the button stops the count but does not reset it. When pressing and holding the clock button for approx. 3 seconds the stop watch will reset. The stop watch will not count when power supply is in sleep mode.

To access **CONFIGURATION MENU**, press and hold the L and S buttons at the same time for approx. 3 seconds. Use the L or S button to index thru the setting, when the setting you want to change is blinking, use either one of the arrow buttons to change the setting. When you are happy with the setting press the clock button once to save and exit configuration menu.
