Migration Michael H. Fisher, 2013-11-04 Migration began with our origin as the human species and continues today Each chapter of world history features distinct types of migration The earliest migrations spread humans across the globe Over the centuries as our cultures societies and technologies evolved in different material environments migrants conflicted merged and cohabited with each other creating entering and leaving various city states kingdoms empires and nations During the early modern period migrations reconnected the continents including through colonization and forced migrations of subject peoples while political concepts like citizen and alien developed In recent history migrations changed their character as nation states and transnational unions sought in new ways to control the peoples who migrated across their borders This volume will explore the process of migration chronologically and also at several levels from the illuminating example of the migration of a individual community to larger patterns of the collective movements of major ethnic groups to the more abstract study of the processes of emigration migration and immigration This book will concentrate on substantial migrations covering long distances and involving large numbers of people It will intentionally balance evidence from the now diverse people s of the world for example by highlighting an exemplary migration for each of the six chapters that highlights different trajectories and by keeping issues of gender and socio economic class salient wherever appropriate Further as a major theme the volume will consider how technology the environment and various polities have historically shaped human migration Exciting new scholarship in the several fields inherent in this topic make it a particularly valuable and timely project

**Migration and the Making of Global Christianity** Jehu J. Hanciles, 2021-03-16 A magisterial sweep through 1500 years of Christian history with a groundbreaking focus on the missionary role of migrants in its spread Human migration has long been identified as a driving force of historical change Building on this understanding Jehu Hanciles surveys the history of Christianity's global expansion from its origins through 1500 CE to show how migration more than official missionary activity or imperial designs played a vital role in making Christianity the world's largest religion Church history has tended to place a premium on political power and institutional forms thus portraying Christianity as a religion disseminated through official representatives of church and state But as Hanciles illustrates this top down perspective overlooks the multifarious array of social movements cultural processes ordinary experiences and non elite activities and decisions that contribute immensely to religious encounter and exchange Hanciles's socio historical approach to understanding the growth of Christianity as a world religion disrupts the narrative of Western preeminence while honoring and making sense of the diversity of religious expression that has characterized the world Christian movement for two millennia In turning the focus of the story away from powerful empires and heroic missionaries *Migration and the Making of Global Christianity* instead tells the more truthful story of how every Christian migrant is a vessel for the spread of the Christian faith in our deeply interconnected world
