Absolute Poverty and Global Justice

Michael Schramm,Thomas Pogge,2016-03-23 Absolute poverty causes about one third of all human deaths some 18 million annually and blights billions of lives with hunger and disease Developing universalizable norms aimed at tackling absolute poverty and the complex and multilayered problems associated with it this book considers the levels trends and determinants of absolute poverty and global inequality Examining whether much faster progress against absolute poverty is possible through reductions in national and global inequalities that produce economic growth for poor countries and households this book suggests that diverse moral views imply that international agencies as well as the citizens corporations and governments of affluent countries bear a moral responsibility to reduce absolute poverty In considering strategies of

eradication through specific policies and structural reforms it is argued that because of its moral importance and requirement for only modest efforts and resources the goal of overcoming absolute poverty must be given much higher political priority by international agencies and governments of affluent countries Suggesting that these agencies should be encouraged to facilitate and promote new initiatives this book concludes with a discussion of how such initiatives might be realized **Millennium Development Goals Progress Report, Lao PDR** Laos,United Nations,2004 **Understanding**

Development Paul Hopper,2012-02-27 Drawing on a wide range of case studies from across the globe this book explores such areas as health and population growth conflict and security global inequality and poverty fair trade and trade liberalization gender and education foreign aid and debt and sustainability and the environment This issues driven text focuses on the debates that have generated the most interest and passion among practitioners and non practitioners alike Always attentive to the contested and plural nature of the field it makes the case for a genuinely interdisciplinary approach which takes full account of the impact of globalization Publisher *Global Economic Governance and the Development Practices of the Multilateral Development Banks* Susan Park,Jonathan R. Strand,2015-08-27 As pillars of the post 1945 international economic system the Regional and Sub Regional Development Banks RSDBs have long been considered mini World Banks reiterating the policy approach of the largest official multilateral development lender in the world The main objective of the collection is to identify what role the RSDBs play in global economic governance and why This edited collection draws together cutting edge original research on these understudied institutions In the burgeoning sub field of global economic governance as well as the broader study of international organisations IOs too often the focus remains on the World Bank and the International Monetary Fund IMF Second order IOs such as the RSDBs receive much less attention despite their longevity and regional importance This volume corrects this oversight by bringing together methodologically diverse research on the RSDBs that interrogates the role and impact of these organisations in global economic governance The book investigates the African Development Bank AfDB the Asian Development Bank AsDB the Inter American Development Bank IDB and the European Bank for Reconstruction and Development EBRD and select sub regional development banks in comparison to the World Bank Group This work will be of great interest to students and scholars of IPE IR and Development Studies *State of the World's Cities 2010/11* Un-Habitat,2010-08-12 The world s urban population now exceeds the world s rural population What does this mean for the state of our cities given the strain this global demographic shift is placing upon current urban infrastructures Following on from previous State of the World s Cities reports this edition uses the framework of The Urban Divide to analyse the complex social political economic and cultural dynamics of urban environments In particular the book focuses on the concept of the right to the city and ways in which many urban dwellers are excluded from the advantages of city life using the framework to explore links among poverty inequality slum formation and economic growth The volume will be essential reading for all professionals and policymakers

in the field as well as a valuable resource for researchers and students in all aspects of urban development Published with UN Habitat

Green Outcomes in the Real World Peter McManners, 2016-04-15 Over the last three decades the world economy has grown strongly on the back of globalization supported by the policies of free trade open markets and privatisation Support has also grown for the concept of sustainability meeting the needs of the present without compromising the ability of future generations to meet their own needs But as the Earth's systems come under increasing strain the inherent conflict between sustainability and globalization has been exposed Green Outcomes in a Real World examines the shift in thinking required to reconcile these two important areas of policy In this ground breaking book Peter McManners has coined the term Proximization to define a new policy framework The principles of Proximization are sustainability subsidiarity primacy of the state and market economics and the application of these familiar concepts towards a sustainable globalised world is novel and different The author argues that adherence to the principles of proximization will return world society to a stable natural order and will mean changes Global commodity flows will reduce and barriers to migration will increase National governments will demand more control over their finances leading to restrictions on capital flows Indeed Peter believes that an element of selfish determination is needed The new world order will be sustainable by design Global organisations such as the UN national governments and global corporations will have to understand and apply a different paradigm The arguments in this book do not reflect the idealism or even naivety of some of the green movement This book is about hard edged reality presented by an author with huge experience and a deep understanding of the business perspective It will appeal to a wide range of professionals involved in setting policy and future direction for businesses governments and non governmental bodies as well as to those with an academic interest in business economics social and environmental issues and public policy

Africa Tony Binns, Etienne Nel, Alan Dixon, 2012-01-11 For many Africa is regarded as a place of mystery and negative images where reports of natural disasters and civil strife dominate media attention with relatively little publicity given to any of the continent's more positive attributes Africa has at last begun to receive the depth of interest it has long deserved in the shape of debates about trade aid and debt the Make Poverty History campaign and the UK's Commission on Africa But behind the superficial media façade Africa is a diverse complex and dynamic place with a rich history and a colonial engagement that although short lived was fundamental in determining the long term future of the continent At the start of the second decade of the twenty first century when the world is engulfed in a major financial crisis Africa has the dubious distinction of being the world's poorest continent This book introduces and demystifies Africa's diversity and dynamism and considers how its peoples and environments have interacted through time and space The background and diversity of Africa's social cultural economic political and environmental systems is examined as well as key development issues which have affected Africa in the past and are likely to be significant in shaping the future of the continent These include the impact of HIV AIDS sources of conflict and post conflict reconstruction the state and governance

the nature of African economies in a global context and future development trajectories Africa Diversity and Development is a refreshing interdisciplinary text which enhances understanding of the background to Africa's current position and clarifies possible future scenarios It is richly illustrated throughout with diagrams and plates and contains a wealth of detailed case studies and current data

Millennium Development Goals Matthew Clarke, Simon Feeny, 2013-09-13 In the year 2000 the international community agreed to a framework to address global poverty This framework known as the Millennium Development Goals was time bound with an end date of 2015 With this end now in sight the international community is focusing on the achievement of these goals However it is also very important that consideration now turns to what will follow the MDGs after 2015

Millennium Development Goals Looking Beyond 2015 provides a critical analysis of the MDGs and discusses a range of issues that must be considered by the international community in determining what poverty alleviation framework might replace

the MDGs This reflection is made even more imperative as the poverty landscape has shifted considerably since these original goals were made This book was originally published as a special issue of the Journal of the Asia Pacific Economy

Politics as Usual Thomas W. Pogge, 2013-04-24 Worldwide human lives are rapidly improving Education health care technology and political participation are becoming ever more universal empowering human beings everywhere to enjoy security economic sufficiency equal citizenship and a life in dignity To be sure there are some specially difficult areas disfavoured by climate geography local diseases unenlightened cultures or political tyranny Here progress is slow and there may be set backs But the affluent states and many international organizations are working steadily to extend the blessings of modernity through trade and generous development assistance and it won't be long until the last pockets of severe oppression and poverty are gone Heavily promoted by Western governments and media this comforting view of the world is widely shared at least among the affluent Pogge's new book presents an alternative view Poverty and oppression persist on a massive scale political and economic inequalities are rising dramatically both intra nationally and globally The affluent states and the international organizations they control knowingly contribute greatly to these evils selfishly promoting rules and policies harmful to the poor while hypocritically pretending to set and promote ambitious development goals Pogge's case studies include the 1 day poverty measurement exercise the cosmetic statistics behind the first Millennium Development Goal the War on Terror and the proposed relaxation of the constraints on humanitarian intervention A powerful moral analysis that shows what Western states would do if they really cared about the values they profess

Least Developed Countries and the WTO H. Hawthorne, 2013-05-07 A norm of special treatment for LDCs created by the UN has spread to various international organisations including the WTO Within the WTO evidence of the institutionalization of the norm can be found both in the agreements and legal documents and the way in which the LDCs have been treated by other states Helen Hawthorne investigates how norms impact on negotiations in international organisations She shows that few studies of international organisations focus on the role of the weaker states in the organization the majority focus either on the major states or the emerging economies By ignoring the role of the poorer weaker states in the GATT WTO we are ignoring the history of these states in the organisation and do not get a true picture of the organization how it operates in relation to them and their impact on the organisation

Developing the Global South Paulos Milkias, 2010 For four decades the UN has attempted to foster development in the countries of the global south The book provides a synopsis of these efforts from the Brandt Commission Report to Boutros Boutros Ghali's Agenda for Development Prof Milkias presents opposing arguments in allotting responsibility for the growing gap between the North and the South and details the Millennium Development Goals and assesses their successes and failures so far He provides suggestions for closing the gap for removing the debt burden that is currently crushing the nations of the South and for relieving the poverty ignorance and disease that plague so much of humanity

The United Nations World Water Development Report 3 World Water Assessment Programme, 2012-05-23 The

United Nations World Water Development Report published every three years is a comprehensive review providing an authoritative picture of the state of the world's freshwater resources. It offers best practices as well as in-depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector. It is the only report of its kind resulting from the collaboration and contributions of the 26 UN agencies, commissions, program funds, secretariats, and conventions that have a significant role in addressing global water concerns. The news media are full of talk of crises in climate change, energy, and food, and troubled financial markets. These crises are linked to each other and to water resources management. Unresolved, they may lead to increasing political insecurity and conflict. Water is required to meet our fundamental needs and rising living standards and to sustain our planet's fragile ecosystems. Pressures on the resource come from a growing and mobile population, social and cultural change, economic development, and technological change. Adding complexity and risk is climate change, with impacts on the resource as well as on the sources of pressure on water. The challenges, though substantial, are not insurmountable. The Report shows how some countries have responded. Progress in providing drinking water is heartening, with the Millennium Development Goal target on track in most regions. But other areas remain unaddressed, and after decades of inaction, the problems in water systems are enormous and will worsen if left unattended. Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity. Leaders in government, the private sector, and civil society determine these objectives and allocate human and financial resources to meet them. Recognizing this responsibility, they must act now.
