last unifying mass ritual of our era with huge numbers of people all focused on the same thing at the same moment That timeless live quality impervious to DVR evoking ancient religious rites makes sports very powerful and very lucrative And the media spectacle around them is only getting bigger brighter and noisier from hot take journalism formats to the creeping infestation of advertising to social media celebrity schemes More importantly sports are sold as an oasis of community to a nation deeply divided They are escapist apolitical the only tie that binds In fact precisely because they appear allegedly above politics sports are able to smuggle potent messages about inequality patriotism labor and race to massive audiences And as the wider culture works through shifting gender roles and masculine power those anxieties are also found in the experiences of female sports journalists athletes and fans and through the coverage of violence by and against male bodies Sports rather than being the one thing everyone can agree on perfectly encapsulate the roiling tensions of modern American life Michael Serazio maps and critiques the cultural production of today s lucrative ubiquitous sports landscape Through dozens of in depth interviews with leaders in sports media and journalism as well as in the business and marketing of sports The Power of Sports goes behind the scenes and tells a story of technological disruption commercial greed economic disparity military hawkishness and ideals of manhood In the end despite what our myths of escapism suggest Serazio holds up a mirror to sports and reveals the lived realities of the nation staring back at us

Campus Life Helen Lefkowitz Horowitz, 2013-09-04 Every generation of college students no matter how different from its predecessor has been an enigma to faculty and administration to parents and to society in general Watching today's students holding themselves in because they had to get A's not only on tests but on deans reports and recommendations Helen Lefkowitz Horowitz author of the highly praised Alma Mater began to ask What has gone wrong how did we get where we are today Campus Life is the result of her search through college studies alumni autobiographies and among students themselves for an answer She begins in

the post revolutionary years when the peculiarly American form of college was born forced in the student faculty warfare in 1800 pleasure seeking Princeton students angered by disciplinary action show pistols and rolled barrels filled with stones along the hallways She looks deeply into the campus through the next two centuries to show us student society as revealed and reflected in the students own codes of behavior in the clubs social and intellectual in athletics in student publications and in student government And we begin to notice for the first time from earliest days till now younger men and later young women as well have entered not a monolithic student body but a complex world containing three distinct sub cultures We see how from the beginning some undergraduates have resisted the ritualized frivolity and rowdiness of the group she calls College Men For the second group the Outsiders college was not so much a matter of secret societies passionate team spirit and college patriotism as a serious preparation for a profession and over the decades their ranks were joined by ambitious youths from all over rural America by the first college women by immigrants Jews townies blacks veterans and older women beginning or continuing their education We watch a third subculture of Rebels both men and women emerging in the early twentieth century transforming individual dissent into collective rebellion contending for control of collegiate politics and press and eventually in the 1960s reordering the whole college university world Yet Horowitz demonstrates in spite of the tumultuous 1960s in spite of the vast changes since the nineteenth century the ways in which undergraduates work and play have continued to be shaped by whichever of the three competing subcultures college men and women outsiders and rebels is in control We see today s campus as dominated by the new breed of outsiders they began to surface in the 1970s driven to pursue their future careers with a grim professionalism And as faint and sporadic signs emerge of perhaps a new activism and a new attraction to learning for its own sake we find that Helen Lefkowitz Horowitz has given us in this study a basis for anticipated the possible nature of the next campus generation *The NeuroICU Book, Second Edition* Kiwon

Consciousness Peter Carruthers,2005-05-26 Peter Carruthers s essays on consciousness and related issues have had a substantial impact on the field and many of his best are now collected here in revised form The first half of the volume is devoted to developing elaborating and defending against competitors one particular sort of reductive explanation of phenomenal consciousness which Carruthers now refers to as dual content theory Phenomenal consciousness the feel of experience is supposed to constitute the hardproblem for a scientific world view and many have claimed that it is an irredeemable mystery But Carruthers here claims to have explained it He argues that phenomenally conscious states are ones that possess both an analog fine grained intentional content and a corresponding higher orderanalog content representing the first order content of the experience It is the higher order analog content that enables our phenomenally conscious experiences to present themselves to us and that constitutes their distinctive subjective aspect or feel The next two chapters explore some of the differences between conscious experience and conscious thought and argue for the plausibility of some kind of eliminativism about conscious thinking while retaining realism about phenomenal consciousness Then the final four chapters focus on the minds of non human animals Carruthers argues that even if the experiences of animals aren t phenomenally conscious as his account probably implies this needn t prevent the frustrations and sufferings ofanimals from being appropriate objects of sympathy and concern Nor need it mean that there is any sort of radical Cartesian divide between our minds and theirs of deep significance for comparative psychology In the final chapter he argues provocatively that even insects have minds that include abelief desire perception psychology much like our own So mindedness and phenomenal consciousness couldn t be further apart Carruthers s writing throughout is distinctively clear and direct The collection will be of great interest to anyone working in philosophy of mind or cognitive science
