Warne, 2020-10-29 Emotional intelligence is an important trait for success at work IQ tests are biased against minorities Every child is gifted Preschool makes children smarter Western understandings of intelligence are inappropriate for other cultures These are some of the statements about intelligence that are common in the media and in popular culture But none of them are true In the Know is a tour of the most common incorrect beliefs about intelligence and IQ Written in a fantastically engaging way each chapter is dedicated to correcting a misconception and explains the real science behind intelligence Controversies related to IQ will wither away in the face of the facts leaving readers with a clear understanding about the truth of intelligence Inside the Mind of the Entrepreneur Ana Tur Porcar, Domingo Ribeiro Soriano, 2017-09-15 This book connects entrepreneurship and psychology research by focusing on the personality dimensions of entrepreneurs entrepreneurial cognition entrepreneurial leadership and gender behavior It features state of the art interdisciplinary research offering a unified perspective on entrepreneurial psychology Individual chapters address advances related to entrepreneurial intentions complexity management personality psychology intrapreneurial behavior entrepreneurial communities and demographic changes among others Laboratory experiments that study entrepreneurial behavior round out the coverage **Studies of Modern Mind & Character at Several European Epochs** John Wilson, 1881 **Virtualism** James G. Carrier, Daniel Miller, 2020-08-25 We live in a time of economic virtualism whereby our lives are made to conform to the virtual reality of economic thought Globalization transnational capitalism structural adjustment programmes and the decay of welfare are all signs of the growing power of economics one of the most potent forces of recent decades In the last thirty years economics has ceased to be just an academic discipline concerned with the study of economy and has come to be the only legitimate way to think about all aspects of society and how we order our lives Economic models are no longer measured against the world they seek to describe but instead the world is measured against them found wanting and made to conform This profound and dangerous change in the power of abstract economics to shape the lives of people in rich and poor countries alike is the subject of this interdisciplinary study Contributors show how economics has come to portray a virtual reality a world that seems real but is merely a reflection of a neo classical model and how governments the World Bank and the IMF combine to stamp the world with a virtual image that condemns as irrational our local social and cultural arrangements Further it is argued that virtualism represents the worrying emergence of new
