Emergency Preparedness and Disaster Recovery in School Libraries Christie Kaaland, William Lokey, 2014-12-16. When disaster strikes, school librarians can play a key role in keeping kids safe. This is the only book written specifically to provide school librarians with emergency preparedness and recovery tools, as well as curricular tie-ins. No school is immune to disaster, whether in the form of a natural event like a tornado or a tragedy like the violence that occurred at Sandy Hook Elementary School. The key to minimizing injury or death in an emergency is preparedness, something the school librarian is uniquely positioned to lead. This must-have book will show you how to be proactive in getting your school ready for the worst. It provides comprehensive preparedness and recovery plans, checklists, and curricular recommendations on preparedness that can be tailored to your individual library and community. Covering natural disasters, human-made disasters, and school violence, the book shows you how to conduct drills, assess vulnerabilities, and risk communicate preparedness plans, and use bibliotherapy for disaster recovery. It also describes how your library can be a safe haven for students who feel disconnected, bullied, or otherwise disenfranchised. Although the book is primarily intended for school librarians, classroom teachers will also find many ideas here for helping students be better prepared for disasters, whatever their cause or severity.

Citizen Relationship Management Alexander Schellong, 2008. This study explores Customer Relationship Management (CRM) in government. Based on an interdisciplinary literature review and multiple case study design, a model of Citizen Relationship Management (CiRM) is developed and discussed. The case studies explore the perceptions of CRM/CiRM by administrators, elected officials, and consultants, as well as its

implementation and impact on the municipal level and in a multijurisdictional environment in the United States Although the explorative part of the study focuses broadly on a theoretical conceptualization of CiRM the immediate empirical referent of research are the 311 initiatives in the City of Baltimore the City of Chicago the City of New York and Miami Dade County Thus the results help administrators and researchers to convey the idea and challenges of 311 well The study shows that CRM is to a certain extent only partly able to make novel contributions to currently active reform movements in government In addition the study s findings support the idea that CiRM provides the means to a different kind of public participation
