Development, K. Yi, L. Harrison**

Fike Cheetah Xi Programming Manual:

CHEETAH 1.0 User's Manual, 2005 CHEETAH is an effort to bring the TIGER thermochemical code into the 1990s A wide variety of improvements have been made in Version 1 0 and a host of others will be implemented in the future In CHEETAH 1 0 I have improved the robustness and ease of use of TIGER All of TIGER s solvers have been replaced by new algorithms I find that CHEETAH solves a wider variety of problems with no user intervention e g no guesses for the C J state than TIGER did CHEETAH has been made simpler to use than TIGER typical use of the code occurs with the new standard run command I hope that CHEETAH makes the use of thermochemical codes more attractive to practical explosive formulators In the future I plan to improve the underlying science in CHEETAH More accurate equations of state will be used in the gas and the condensed phase A kinetics capability will be added to the code that will predict reaction zone thickness CHEETAH is currently a numerical implementation of C J theory It will become an implementation of ZND theory Further ease of use features will eventually be added an automatic formulator that adjusts concentrations to match desired properties is planned
