Womanhood and Girlhood in Twenty-First Century Middle Class Kenya Besi Brilliant Muhonja, 2017-12-29 This study of twenty first century girlhoods and womanhoods charts a new area of scholarship on Kenya. The chapters investigate questions related to how new rituals of girlhood and womanhood that materialize when religious indigenous and foreign worlds encounter each other are re structuring family and society recasting roles and informing fresh conceptualizations of African girlhood and womanhood. The author's interdisciplinary analysis and writing journeys through the different stages of girlhood and womanhood as ritualized by Kenya's 21st century middle class and teases out the implications of these peculiarities to identity re creation and the restructuring of societies organs and traditionally gendered institutions. Applying a critical African studies lens the arguments in this book center women as originators of action and thought without inquiring into a male other. Essentially this work disrupts patri centered constructions and examinations of female bodies and identities. The resulting deductions inform on the substratum of Kenyan girls and women's self definitions as manifest through their experiences and ritualized practices and articulate the impact of the performances of these bodies and identities on Kenyan and global societies. *Randomized Control Trials in the Field of Development* Florent Bédécarrats, Isabelle Guérin, François Roubaud, 2020-09-17 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations. In October 2019 Abhijit Banerjee Esther Duflo and Michael Kremer jointly won the 51st Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel for their experimental approach to alleviating global poverty. But what is the exact scope of their

experimental method known as randomized control trials RCTs Which sorts of questions are RCTs able to address and which do they fail to answer The first of its kind Randomized Control Trials in the Field of Development A Critical Perspective provides answers to these questions explaining how RCTs work what they can achieve why they sometimes fail how they can be improved and why other methods are both useful and necessary Bringing together leading specialists in the field from a range of backgrounds and disciplines economics econometrics mathematics statistics political economy socioeconomics anthropology philosophy global health epidemiology and medicine it presents a full and coherent picture of the main strengths and weaknesses of RCTs in the field of development Looking beyond the epistemological political and ethical differences underlying many of the disagreements surrounding RCTs it explores the implementation of RCTs on the ground outside of their ideal theoretical conditions and reveals some unsuspected uses and effects their disruptive potential but also their political uses The contributions uncover the implicit worldview that many RCTs draw on and disseminate and probe the gap between the method's narrow scope and its success while also proposing improvements and alternatives Without disputing the contribution of RCTs to scientific knowledge Randomized Control Trials in the Field of Development warns against the potential dangers of their excessive use arguing that the best use for RCTs is not necessarily that which immediately springs to mind Written in plain language this book offers experts and laypeople alike a unique opportunity to come to an informed and reasoned judgement on RCTs and what they can bring to development
