Guide to Information Sources in the Forensic Sciences Cynthia Holt, 2006 Thanks to the O J Simpson case not to mention the overwhelming success of the CSI franchise

the general public is both aware of and curious about the world of forensics i.e. the investigation and establishment of facts or evidence in a court of law. The forensic sciences incorporate the application of principles and methods from a cadre of specialized scientific and technical disciplines to a vast array of criminal and civil legal questions. To this end Cynthia Holt has compiled a comprehensive bibliography of resources recommended to support research in the forensic sciences and its various subspecialties. Holt's introductory chapter clarifies the distinctions between the major forensic sciences specialties; in addition, it provides an overview of the hierarchy of various classification systems for the forensics literature. The bibliography itself is grouped by type of material, e.g., journals, abstracts, and indexes. Books. Topics include ballistics, DNA analysis, etymology, expert witnessing, and facial imaging reconstruction, as well as contributions from academic fields such as anthropology, linguistics, and engineering. Tools are primarily in English, with a few non-English titles included for reasons of significance. With a preface by Professor Moses S. Schanfield, Chair of the Department of Forensic Sciences at George Washington University.

The Handbook of Forensic Rorschach Assessment Carl B. Gacono, 2008. The Handbook of Forensic Rorschach Assessment underscores the unique contribution the Rorschach makes to forensic practice. All of the chapters include the expertise of a licensed practicing forensic psychologist and offer a systematic approach to personality assessment in presenting use of the Rorschach in specific forensic contexts.

Malingering, Feigning, and Response Bias in Psychiatric/Psychological Injury Gerald Young, 2014-02-11. This book is a comprehensive analysis of the definitions, concepts, and recent research on malingering, feigning, and other response biases in psychological injury forensic disability populations. It presents a new model of malingering and related biases and develops a diagnostic system based on it that is applicable to PTSD, chronic pain, and TBI. Included are suggestions for effective practice and future research based on the literature reviews and the new systems, which are useful also because they can be used readily by psychiatrists as much as psychologists. In *Malingering, Feigning, and Response Style Assessment in Psychiatric Psychological Injury*, Dr. Young ambitiously sets out to articulate and synthesize the polarities involved in the assessment of response styles in psychological disabilities, including PTSD, pain, and TBI. He does so thoroughly and very evenhandedly, neither minimizing the degree that outright faking can be found in substantial numbers of examinees nor disregarding the possibility that there can be causes for validity test failure other than malingering. He reviews the prior systems for classifying evidence of malingering and proposes his own criteria for feigned PTSD. These are conservative and well grounded in the prior literature. Finally, the book contains dozens of very recent references, giving testament to Dr. Young's immersion in the personal injury literature, as might be expected from his experience as founder and Editor in Chief for Psychological Injury and the Law Reviewer. Steve Rubenzer, Ph.D., ABPP, Board Certified Forensic Psychologist.
