I. BEGINNING YOUR PAPER - Topic Selection and Research

- (a) **Topic Selection:** Your topic should be something you are interested in within the confines of the course you are taking and at the instructor's discretion.
- (b) **Research:** Read as much as you can about your topic. Find as many academic sources about your topic as possible. Books are best; however, academic websites work, too (these are primarily .edu sites).
- (c) Once you understand your topic, **create a "why" or "how" question** that will generate discussion or argument.
- (d) **Thesis Statement:** Formulate a thesis statement that begins to answer the question you have about your topic. This should include an argument and several reasons to help prove your argument.
- (e) **Format:** Establish the format for your paper. This may be dependent upon the class or discipline for which you are writing your paper. Common formats include APA style, Chicago-manual style, or MLA style.

FM 2005: Formal Methods John Fitzgerald, Ian J. Hayes, 2005-08-25 This volume contains the proceedings of Formal Methods 2005 the 13th

International Symposium on Formal Methods held in Newcastle upon Tyne UK during July 18-22 2005. Formal Methods Europe (FME) www.fmeurope.org is an independent association which aims to stimulate the use of and research on formal methods for system development. FME conferences began with a VDM Europe symposium in 1987. Since then the meetings have grown and have been held about once every 18 months. Throughout the years the symposia have been notably successful in bringing together researchers, tool developers, vendors, and users both from academia and from industry. Formal Methods 2005 confirms this success. We received 130 submissions to the main conference from all over the world. Each submission was carefully refereed by at least three reviewers. Then after an intensive in-depth discussion, the Program Committee selected 31 papers for presentation at the conference. They form the bulk of this volume. We would like to thank all the Program Committee members and the referees for their excellent and efficient work. Apart from the selected contributions, the Committee invited three keynote lectures from Mathai Joseph, Marie Claude Gaudel, and Chris Johnson. You will find the abstracts of papers for their keynote lectures in this volume as well.

An innovation for the FM2005 program was a panel discussion on the history of formal methods with Jean-Raymond Abrial, Dines Bjørner, Jim Horning, and Cli Jones as panelists. Unfortunately, it was not possible to reflect this event in the current volume, but you will find the material documenting it elsewhere. See the conference Web page. **Formal Foundations of Reuse and Domain Engineering** Stephen H. Edwards, Gregory Kulczyk, 2009-09-19. ICSR is the premier international conference in the field of software reuse. The main goal of ICSR is to present the advances and improvements within the software reuse domain as well as to promote interaction between researchers and practitioners. The 11th International Conference on Software Reuse (ICSR 2009) was held during September 27-30 2009 in Falls Church, VA, USA. 2009 was the year that ICSR went back to its roots. The theme was Formal Foundations of Reuse and Domain Engineering. We explored the theory and formal foundations that underlie current reuse and domain engineering practice and looked at current advancements to get an idea of where the field of reuse was headed. Many of the papers in these proceedings directly reflect that theme. The following workshops were held in conjunction with ICSR 2009: Second Workshop on Knowledge Reuse (KREUSE 2009), RESOLVE 2009 (Software Verification: the Cornerstone of Reuse), First International Workshop on Software Ecosystems, International Workshop on Software Reuse and Safety (RESAFE 2009). Aside from these workshops and the papers found here, the conference also included five tutorials, eight tool demos, and a doctoral symposium. Links to all of this information and more can be found at the ICSR 11 conference website at icsr11.isase.org. **Formal Methods and Software Engineering**
