misused requires important conceptualization work in order for it to be considered in all of its forms and not simply reduced
to the account of others Although otherness certainly questions the link to the other relation it also questions the link to the
self reflexivity and the link to knowledge epistemology Being tridimensional the process of otherness is a paradox the
meaning of which can only be drawn thanks to ethics psychoanalytical orientation and the history of philosophical ideas This
book which relates to philosophy of education seeks to explain the problematic notion of otherness the desire for which is
specific to humankind It examines how otherness questions the limits of knowledge transmission and language and argues
that it is in fact a value a tool and practice for all the actors involved in the relationship between education knowledge and
