Engineering Design and Mathematical Modelling Nnamdi Nwulu, Mammo Muchie, 2020-12-17 Engineering Design and Mathematical Modelling Concepts and Applications consists of chapters that span the Engineering design and mathematical modelling domains Engineering design and mathematical modelling are key tools techniques in the Science Technology and Innovation spheres Whilst engineering design is concerned with the creation of functional innovative products and processes mathematical modelling seeks to utilize mathematical principles and concepts to describe and control real world phenomena Both of these can be useful tools for spurring and hastening progress in developing countries They are also areas where Africa needs to skill up in order to build a technological base The chapters in this book cover the relevant research trends in the fields of both engineering design and mathematical modelling This book was originally published as a special issue of the African Journal of Science Technology Innovation and Development "ECEG2016-Proceedings of 16th European Conference on e-Government ECEG 2016 " Mitja De Man, Tina Juki, 2016-06-02 Imaging and Assessing Mobile Technology for Development Richard Musabe, John Sören Pettersson, 2024-04-08 Imaging and assessing mobile technology for development M4D means understanding the use of appropriate technologies and services and how they directly or indirectly address socio economic challenges This book adopts various perspectives to identify the obstacles to affordable digital technologies in order to enable enhance and effect development The book plays on the tension between success reports and optimistic projections on one hand and empirical evidence of technological belly splash on the other hand The areas covered include infusion of service education in computing education the Rwandan establishment of African Centres of Excellence to promote the development of appropriate technology the metaverse s realisation in a mobile network enabled metaversity and difficulties detected when evaluating digitisation of distance learning students security awareness dissemination of agricultural information and mobile payment The decolonisation of community based media and attempts to step outside the mobile network and Internet are also covered **Impact of Immigration and Xenophobia on Development in Africa** Mafukata, Mavhungu Abel, 2020-12-25 Human movement has an influence on the socio economic dynamics of people regions and countries The schisms between host and immigrants impact how host countries utilize immigrant skills and expertise to benefit their economies However immigrants are impacted by negative diplomatic relations between countries that limit the free movement of people and the welfare of immigrants In association this brings about social challenges such as Afrophobia racism xenophobia hatred and violence within these countries While these challenges are deeply rooted across the world Africa has its own unique challenges Still struggling with massive underdevelopment Africa needs to remove all the negative factors that could impede its quest of achieving development imperatives Impact of Immigration and Xenophobia on Development in Africa analyzes the genesis and evolution of immigration in Africa and how this has resulted in social challenges such as xenophobia within the continent The book focuses on demonstrating how immigrant skills and expertise

can be positively utilized to assist African development and asserts the existence of xenophobia in respective countries does not assist Africa's quest of resolving its own challenges. The chapters within this book therefore explore how this subsequent output of xenophobia has impacted African development and focuses on the revival of Pan Africanism as a uniting instrument and ideology for Africans. This book is a valuable reference tool for activists, retired and practicing politicians, governments, policymakers, practitioners, stakeholders, researchers, students, and academicians. Inyathi Ibuzwa Kwabaphambili Babalwa Magoqwana, Siphokazi Magadla, Athambile Masola, 2024-10-21 This book seeks to create a systematic eclectic historical picture of the present and past women intellectuals, activists, artists, and cultural custodians. Using the concept of *ukufukama* (incubate), we connect intergenerational knowledge transfer of our elders to the current struggles faced by the younger generation of women. We bring together different authors who engage the biographical and intellectual contributions of different African women and their imagination of the democratic South Africa. Writing about the various feminist intellectual traditions between the 19th and 21st centuries, this book systematically pulls together oral and creative texts to recover the memories of Nosuthu Jotelo Sarah Baartman, Nontsizi Mqgqwetho, Phyllis Ntantala, Brigalia Bam, Umntwana uMagogo, Miriam Makeba, Sibongile Khumalo, Lebo Mathosa, Thandiswa Mazwai, Celeste Ntuli, Nkosazana Dlamini, Zuma Neo, Mathabe among the lives and works covered here. This range of voices shows that intellectual work is varied and has the ability to sit alongside each other. It importantly shows that scholarship emerges through community and conversation, which is to say feminist histories are created and recreated through conversations that care about women's voices, stories, and being in the world. Ultimately, we think of the women featured in this book as forming a lineage, a tradition of black women's survival wisdom which facilitated change and enduring radical transformation that demands theorisation and celebration.

Vermicomposting for Sustainable Food Systems in Africa Hupenyu Allan Mupambwa, Lydia Ndinela Horn, Pearson Nyari Stephano Mnkeni, 2023-03-01 This edited book collates the research done mainly in Africa on vermicomposting and related technologies that can assist African smallholder farmers in making nutrient-rich organic fertilizers from their animal and crop residue wastes. Information on the development of organic sources of liquid fertilizer development for hydroponics is also presented. The book presents research findings on vermicomposting in a simplified way that will allow farmers and extension workers to adopt the indicated technologies. The book also covers critical aspects of standardization of vermicompost preparation, earthworm biology, nutrient enrichment of composts, and organic liquid fertilizer production. Vermicomposting is a technology that employs earthworms to enhance the biodegradation and fertilizer value of organic wastes. The earthworms optimize the biodegradation ecosystem during composting, resulting in a final nutrient-rich product with more recalcitrant forms of carbon and much lower levels of veterinary antibiotics and their metabolites. Vermicompost as an organic fertilizer is highly preferred over other forms of soil enhancers. A lot of research has been done on vermicompost and related activities in Africa but remain scattered across various publications. The book is an invaluable

source of information for farmers especially those practicing organic crop production vermicomposting researchers as well as extension workers
