Imaging Our Solar System: The Evolution of Space Mission Cameras and Instruments Bernard Henin, 2022-01-28 As we speak stunning new snapshots of our Solar System are being transmitted to Earth by a fleet of space probes landers and rovers Yet nowadays it is all too easy to take such images for granted amidst the deluge of competing visuals we scroll through every day To truly understand the value of these incredible space photos we first need to understand the tools that made them possible This is the story of imaging instruments in space detailing all the technological missteps and marvels that have allowed us to view planetary bodies like never before From the rudimentary cameras launched in the 1950s to the cutting edge imaging instruments onboard the Mars Perseverance rover this book covers more

than 100 imaging systems sent aboard various spacecraft to explore near and distant planetary bodies Featured within are some of the most striking images ever received by these pioneering instruments including Voyager's Pale Blue Dot Apollo's Blue Marble Venera's images from the surface of Venus Huygens images of Titan New Horizon's images of Pluto and Arrokoth and much more Along the way you will learn about advancements in data transmission digitization citizen science and other fields that revolutionized space imaging helping us peer farther and more clearly across the Solar System

Creation Rediscovered Jeffery M. Leonard, 2021-10-05 Creation Rediscovered by Jeffery M Leonard guides readers through a contextual reading of the Bible's creation stories Over the last two centuries few subjects have generated as much controversy for Christians as has creation The whethers whens and hows of creation have often become a battlefield in which the pitched forces of competing sides Darwinists and creationists young earthers and old figurativists and literalists have struggled for the upper hand Like most battles this fight has tended to inflict a fair amount of collateral damage along the way This is especially true for those put in the terrible position of feeling they have had to choose between the Bible they have fallen in love with and the science they have studied In this book Jeffery Leonard writes to fellow travelers in the faith who want to take the biblical text seriously while at the same time appreciate science's exploration of what we consider to be God's creation It is his contention that setting the Bible's creation texts back within their ancient context allows us to do both of these things Indeed Leonard believes that when we reread what the Bible has to say about creation in its original setting we find meaning in the text far more profound than what we have previously imagined Key points and features Written by a Bible scholar Unique timely and fresh interpretation Helps readers see the Bible's creation stories as vessels of healing and hope in God's larger plan for humanity Attempts to redirect Christians to read the ancient creation stories within the context in which they were written

Remote and Robotic Investigations of the Solar System C.R. Kitchin, 2017-09-18 Interest in and knowledge of the techniques utilised to investigate our solar system has been growing rapidly for decades and has now reached a stage of maturity Therefore the time has now arrived for a book that provides a cohesive and coherent account of how we have obtained our present knowledge of solar system objects not including the Sun Remote and Robotic Investigations of the Solar System covers all aspects of solar system observations the instruments their theory and their practical use both on Earth and in space It explores the state of the art telescopes cameras spacecraft and instruments used to analyse the interiors surfaces atmospheres and radiation belts of solar system objects in addition to radio waves gamma rays cosmic rays and neutrinos This book would be ideal for university students undertaking physical science subjects and professionals working in the field in addition to amateur astronomers and anyone interested in learning more about our local astronomical neighbours
