Computer Algorithms C++ Ellis Horowitz, Sartaj Sahni, Sanguthevar Rajasekaran, 1997

The author team that established its reputation nearly twenty years ago with *Fundamentals of Computer Algorithms* offers this new title available in both pseudocode and C versions. Ideal for junior senior level courses in the analysis of algorithms, this well researched text takes a theoretical approach to the subject creating a basis for more in depth study and providing opportunities for hands on learning. Emphasizing design technique, the text uses exciting state of the art examples to illustrate design strategies.

Advanced Environments, Tools, and Applications for Cluster Computing

Dan Grigoras, Alex Nicolau, Bernard Toursel, Bertil Folliot, 2003-08-01

Started by small group of well known scientists with the aim of sharing knowledge, experiences and results on all aspects of cluster computing, the initiative of a workshop on cluster computing received more attention after IFIP WG 10.3 and IEEE Romania Section accepted our request for sponsorship. Moreover the application for a NATO ARW grant was successful leading to a greater interest in the workshop. In this respect we have to say that we chose Romania in order to attract scientists from Central and Eastern European countries and improve the cooperation in the region in the field of cluster computing. We had an extremely short time to organize the event but many people joined us and enthusiastically contributed to the process. The success of the workshop is wholly due to the hard work of the organizing committee members of the program committee, key speakers, speakers from industry and authors of accepted papers. The workshop consisted of invited and regular paper presentations followed by discussions on many important current and emerging topics ranging from scheduling and load balancing to grids. The key speakers devoted their time and efforts to presenting the most interesting results of their research groups and we all thank them for this. All papers were peer reviewed by two or three reviewers.
