First Edition** Amir Khorram-Manesh,2017-10-10 We propose here a comprehensive educational program based on the best available evidence to date drawn from recent publications intended to impart the knowledge skills and abilities necessary for the role of crisis manager We expect this program to enhance the intercultural and interagency performance across the Disaster Management DM cycle Here Intercultural does not refer to different nations and cultural backgrounds but rather to working cultures within diverse agencies Since communication and information shortcomings are the most common reason for failed DM this educational program focuses heavily on collaboration and interoperability between trained professionals involved in disaster response to ensure that they understand the need for collaboration and are aware of each other s limitations and possibilities The aim of programs such as this is not to re educate people in respect to their profession area of expertise but rather to train them in elements specific to DM and ways in which they can apply their existing knowledge and professional expertise

in the disaster context Such multidisciplinary programs cover all disaster phases accommodate the needs of each organization and offer a safe environment where participants are able to learn by doing in an interactive environment vertically within their own organization and horizontally together with other organizations by focusing on shared training cooperation and intercultural understanding Such programs bring some degree of standardization and offer a thorough evaluation of participants and the program by using evidence based scientific methods One important part of the program is to offer a standardized handbook in which all necessary information is gathered This is not intended as a substitute for reference books but it is intended to make the information accessible and easy to learn so that the information can be combined with the practical parts of the education

Event Information Systems Markus Heuchert ,2021-04-15 Events are an essential element of society Advancing digital technologies and the ongoing globalization has put forward a variety of different business leisure or scientific events that need to be managed in order to take place As a result of the proliferation of digital technology IT systems are an indispensable part of this management process Amid this pandemic crisis these systems have become increasingly important due to the relocation of events into the virtual sphere Since every event entails different requirements event management systems need to be very flexible In contrast to other application systems this flexibility is needed during use as the requirements of future events are not known during the initial selection and roll out of the software This calls for an intensified dialogue between the business and IT to match technical possibilities with practical requirements Currently adequate means to support this dialogue are lacking To this end this dissertation presents a reference model that encompasses the essential processes and data structures in the domain In 36 application cases the reference model is instantiated and evaluated Practitioners and researchers are the intended audiences of this work Researchers may use it as a foundation to design novel IT artifacts in the domain Practitioners benefit from the first comprehensive tool to support the design and use of digital technology in event management

Information Quality Richard Wang,Elizabeth M. Pierce,Stuart Madnick,Craig Fisher,2014-12-18 Organizations today have access to vast stores of data that come in a wide variety of forms and may be stored in places ranging from file cabinets to databases and from library shelves to the Internet The enormous growth in the quantity of data however has brought with it growing problems with the quality of information further complicated by the struggles many organizations are experiencing as they try to improve their systems for knowledge management and organizational memory Failure to manage information properly or inaccurate data costs businesses billions of dollars each year This volume presents cutting edge research on information quality Part I seeks to understand how data can be measured and evaluated for quality Part II deals with the problem of ensuring quality while processing data into information a company can use Part III presents case studies while Part IV explores organizational issues related to information quality Part V addresses issues in information quality education

Public Health Informatics and Information Systems J.A. Magnuson,Brian E. Dixon,2020-07-17 This 3rd edition of a classic textbook examines the context

and background of public health informatics explores the technology and science underlying the field discusses challenges and emerging solutions reviews many key public health information systems and includes practical case based studies to guide the reader through the topic The editors have expanded the text into new areas that have become important since publication of the previous two editions due to changing technologies and needs in the field as well as updating and augmenting much of the core content The book contains learning objectives overviews future directions and review questions to assist readers to engage with this vast topic The Editors and their team of well known contributors have built upon the foundation established by the previous editions to provide the reader with a comprehensive and forward looking review of public health informatics The breadth of material in Public Health Informatics and Information Systems 3rd edition makes it suitable for both undergraduate and graduate coursework in public health informatics enabling instructors to select chapters that best fit their students needs
