resource in its field      Insurability of Emerging Risks Baris Soyer, Özlem Gürses, 2025-01-23 This book brings together leading experts in the fields of insurance and the law of obligations to consider how insurance law is attempting to deal with emerging risks Emerging risks pose significant challenges for the insurance industry Apart from difficulties in quantifying such risks the availability of insurance capacity is often a concern The book looks at these issues from philosophical economic and actuarial perspectives It asks how far existing private law rules can cope with emerging risks and in so far as they cannot how the law should be developed by courts and lawmakers to deal with the emerging legal issues The book questions the suitability of the current insurance business models in insuring climate related risks autonomous systems insurance of fines and penalties as well as how mass or systemic risks eg pandemics or cyber risks can be made insurable through add on coverages to the conventional insurance policies It also evaluates governments roles to encourage insurers to provide cover for such risks and discusses how a balance can be struck between the need to regulate and the insurance markets dynamics The book will be of academic interest to anyone working in the field of insurance and also relevant for market participants policy makers and regulators      *Carter v Boehm and Pre-Contractual Duties in Insurance Law* Yong Qiang Han, Greg Pynt, 2018-06-28 Revisiting *Carter v Boehm* the collected papers in this book are intended as a catalyst for rethinking the pre contractual duties in insurance law and the related principle of utmost good faith at a critical time for insurance law In so doing it endeavours to provide insurance law students academics practitioners and judges with new perspectives for a keen understanding of this fundamental aspect of insurance law which has become increasingly dynamic under both common law and civil law legal traditions It will explore to what extent and why the doctrines of pre contractual duties in insurance law under the two major legal traditions are converging as well as the implications of such convergence It will be of great interest to students academics and practitioners in the field of insurance law      Policyholder's Reasonable Expectations Yong Qiang Han, 2016-11-03 Over the past two decades protecting contractual parties reasonable expectations has incrementally gained judicial recognition in English contract law In contrast however the similar doctrine of policyholder s reasonable expectations has been largely rejected in English insurance law This is injurious firstly to both the consumer and business policyholder s reasonable expectations of coverage of particular risks and secondly to consumer policyholder s reasonable expectations of bonuses in with profits life insurance To remedy these problems this book argues for an incremental but definite acceptance of the conception of policyholder s reasonable expectations in English insurance law It firstly discusses the homogeneity between insurance law and contract law as well as the role of reasonable expectations and their relevance to the emerging duty of good faith in contract law Secondly following a review and re characterisation of the American insurance law doctrine of reasonable expectations the book addresses the conventional English objections to the reasonable expectations approach in insurance law In passing it also rethinks the approach to the protection of policyholder s reasonable expectations of bonuses in with profits life insurance through a revisit to the in famous case *Equitable Life*
