DeMartino, 2024-05-31 A forceful critique of the social science that has ruled and damaged the modern world The practice of economics as economists will tell you is a powerful force for good Economists are the guardians of the world's economies and financial systems The applications of economic theory can alleviate poverty reduce disease and promote sustainability While this narrative has been successfully propagated by economists it belies a more challenging truth economic interventions including those economists deem successful also cause harm Sometimes the harm is manageable and short lived But just as often the harm is deep enduring and even irreparable And too often the harm falls on those least able to survive it In *The Tragic Science* George F. DeMartino says what economists have too long repressed that economists do great harm even as they aspire to do good Economist induced harm DeMartino shows results in part from economists irreparable ignorance from the fact that they know far less than they tend to believe they know and from disciplinary training that treats the human tolls of economic policies and interventions as simply the costs of promoting social betterment DeMartino details the complicated nature of economic harm explores economists frequent failure to recognize it and makes a sobering case for professional humility and for genuine respect for those who stand to be harmed by economists practice At a moment in history when the

economics profession holds enormous power DeMartino's work demonstrates the downside of its influence and the responsibility facing those who practice the tragic science
